

Management Discussion and Analysis

For the Three and Nine Month Periods Ended June 30, 2012

REPORT DATED: AUGUST 27, 2012

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

1. Introduction

This management discussion and analysis (“**MD&A**”), dated August 27, 2012, provides a review of the financial position and results of operations of Almonty Industries Inc. (TSX-V: AII) (“**Almonty**” or the “**Company**”). This MD&A reviews the business of Almonty and discusses the Company’s financial results for the three and nine month periods ended June 30, 2012. It should be read in conjunction with the unaudited consolidated interim financial statements and notes thereto of the Company for the three and nine month periods ended June 30, 2012.

The Company’s management is responsible for the preparation of the consolidated financial statements as well as other information contained in this MD&A. The board of directors of Almonty (the “**Board of Directors**”) is required to ensure that management assumes its responsibility in regard to the preparation of the Company’s financial statements. To facilitate this process the Board of Directors has created an audit committee (the “**Audit Committee**”). The Audit Committee meets with members of the management team to discuss the operating results and the financial results of the Company, before making their recommendations and submitting the financial statements and MD&A to the Board of Directors for review and approval. Following the recommendation of the Audit Committee, the Board of Directors approved the unaudited consolidated interim financial statements for the three and nine month periods ended June 30, 2012 and this MD&A on August 27, 2012.

The unaudited consolidated interim financial statements of the Company for the three and nine month periods ended June 30, 2012 have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”).

All currency figures in this MD&A appear in thousands of Canadian dollars unless otherwise stated.

On September 23, 2011, the Company (then RCG Capital Inc. (“**RCG**”)) completed its qualifying transaction (the “**Qualifying Transaction**”), whereby all of the issued and outstanding securities of 7887523 Canada Inc. (“**Almonty Sub**”) were acquired in exchange for securities of the Company on a one-for-one basis and the Company changed its name to “Almonty Industries Inc.” and its stock symbol to “AII”. The Qualifying Transaction was a reverse take-over with the former shareholders of Almonty Sub holding approximately 98% of the outstanding shares of the Company immediately following its completion. In connection with the Qualifying Transaction and immediately prior to its completion, Almonty Sub acquired all of the issued and outstanding shares of Daytal Resources Spain, S.L. (“**Daytal**”) from Heemskirk Europe PLC and Heemskirk Consolidated Limited (collectively, “**Heemskirk**”). Daytal is the owner of a 100% interest in the Los Santos tungsten project located near Salamanca, Spain (the “**Los Santos Project**”). Immediately prior to the completion of the Qualifying Transaction the outstanding securities of the Company (then RCG) were consolidated on the basis of one post consolidation security for each of the previously outstanding 6.67 securities of the Company effective September 23, 2011.

In accordance with IFRS 3, *Business Combinations*, the Qualifying Transaction constituted a reverse acquisition of a non-operating company. The Qualifying Transaction does not constitute a business combination as, prior to the completion of the Qualifying Transaction, the Company (then RCG) did not meet the definition of a business under the accounting standard. As a result, the Qualifying Transaction is accounted for as a capital transaction with Almonty Sub being identified as the accounting acquirer and the equity consideration being measured at fair value. The resulting statement of financial position is

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

presented as a continuance of Almonty Sub. Almonty Sub was incorporated on June 9, 2011 for the express and sole purpose of completing the acquisition of Daytal. There was no activity in Almonty Sub prior the acquisition of Daytal, therefore there are no comparative figures available for the three or nine month periods ended June 30, 2012.

Additional information about the Company, along with the audited consolidated financial statements of the Company for the period June 9, 2011 to September 30, 2011 and the unaudited interim financial statements of the Company for the three and nine month periods ended June 30, 2012 are available on the Company's website at www.almonty.com and on SEDAR (www.sedar.com) under Almonty's profile.

Forward-Looking Information

This MD&A contains forward-looking statements that reflect management's expectations, estimates and projections concerning future events in relation to the Company's business and economic environment in which it operates. Forward-looking statements may include, but are not limited to, statements with respect to future remediation and reclamation activities, future mineral exploration, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing of activities and the amount of estimated revenues and expenses, the success of exploration activities, permitting time lines, the success of mine development and construction activities, the success of future mine operations, the success of other future business operations, requirements for additional capital and sources and uses of funds. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects", "anticipates", "plans", "estimates", "intends", "strategy", "goals", "objectives" or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be "forward-looking statements".

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events, results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, but are not limited to, the inability of the Company to maintain its interest in its mineral projects or to obtain or comply with all required permits and licences, risks normally incidental to exploration and development of mineral properties, uncertainties in the interpretation of drill results, the possibility that future exploration, development or mining results will not be consistent with expectations, changes in governmental regulation adverse to the Company, lack of adequate infrastructure at the mineral properties, economic uncertainties, the inability of the Company to obtain additional financing when and as needed, competition from other mining businesses, the future price of tungsten and other metals and commodities, fluctuation in currency exchange rates, title defects and other related matters. See Section 10, "Risks and Uncertainties", in this MD&A for a further discussion of factors that could cause the Company's actual results, performance or achievements to be materially different from any anticipated results, performance or achievements expressed or implied by forward-looking statements. The forward-looking statements in this MD&A represent the expectations of management as of the date hereof and accordingly, are subject to change after such date. Readers should not place undue importance on forward-looking statements and should not rely upon these statements as of any other date. The Company does not undertake to update any forward-looking information, except

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

as, and to the extent required by applicable laws. The forward-looking statements contained herein are expressly qualified by this cautionary statement.

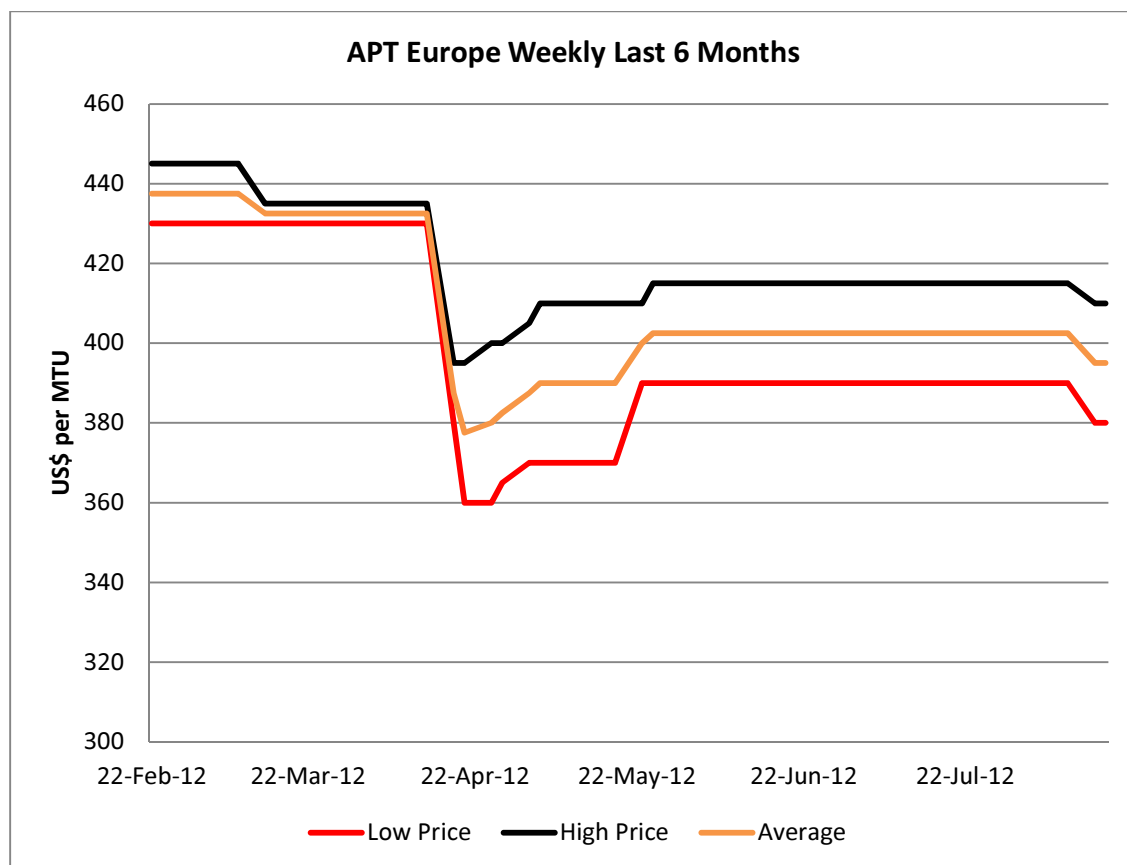

A glossary of terms is affixed to the last page of this MD&A.

2. Overview

Almonty is a publicly traded company listed on the TSX Venture Exchange (the “TSX-V”) under the symbol “AII”. The principal business of Almonty is the production of tungsten concentrate and the advancement of exploration and development activities at the Los Santos Project. The Los Santos Project is a tungsten mine located approximately 50 kilometres from Salamanca, in western Spain. The mine has been in production since 2008 and produces tungsten concentrate products which are currently sold under a long-term supply agreement. The mine was opened in June 2008 and commissioned in July 2010 by its former owner, Heemskirk.

The tungsten business outlook has remained robust since Almonty first entered into negotiations to acquire Daytal in April 2011. A continued global supply shortfall for tungsten concentrates coupled with increasing demand has led to sustained higher prices over the first 9 months of Almonty’s ownership of the Los Santos Project. Additional planned global mine output will be required in order to meet forecasted demand increases.

Tungsten prices according to the MB European quotation for APT (from which Almonty’s concentrate prices are derived by varying formulae under its long-term supply agreement) have recently recovered to the US\$400/MTU level since the recent price declines in April 2012. Almonty prices its tungsten concentrate product in relation to the prior month’s average quoted price for APT on the MB European quotation service. The price Almonty received for its tungsten concentrate during May and June was negatively impacted by the decline in the MB European quoted price during the month of April and May resulting in a lower average price for its Tungsten concentrate compared to the previous quarter.

Source: Metal Bulletin, ammonium para tungstate (APT), European (US\$/MTU),

Almonty continues to believe that long-term market fundamentals remain robust with limited availability of product on the market and strong demand for tungsten concentrate.

Almonty has identified areas of operational improvement and has embarked on a plan to increase the recovery of tungsten concentrate from the Los Santos Project to industry standard through operational changes and enhancements to the milling circuit and improvements to the way in which ore is fed into the processing circuits. Results to date have been promising and the improvement in tungsten recoveries is on target. Optimization of the existing gravity mill circuits has been completed with the addition of a hydrosizer that was added to the processing circuit and commissioned during May 2012. This has led to an increase in the average tungsten recovery rate to 60.5% and 60.0% for the months of June 2012 and July 2012 respectively. The addition of a flotation circuit is in progress. Site preparation work has begun and final engineering plans have been completed. The addition of the flotation circuit is expected to improve the overall tungsten recovery rate to a minimum of 65%. The Company believes it is on track to achieve this targeted recovery rate by the end of calendar 2012.

Management has also identified several opportunities to expand the Los Santos Project’s potential and has begun an exploration campaign with the intent of converting measured and indicated mineral resources to

Management Discussion and Analysis
 For the Three and Nine Month Periods Ended June 30, 2012
 Dated August 27, 2012

proven and probable mineral reserves. The exploration campaign is targeting over 7,000 metres of drilling per year over the next 4 years and Almonty is working with third party mining consultants to optimize the pit design based on the results of the drilling campaign. As at the date of this MD&A, Almonty had completed approximately 5,078 metres of drilling as at June 30, 2012 (3,377 metres as at March 31, 2012) and is currently in the process of analysis and reviewing the results of the campaign. Almonty intends to perform sufficient drilling in order to support the completion of an updated National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* (“**NI 43-101**”) compliant technical report prior to the end of calendar 2012. Almonty will provide updates on this and other initiatives as they progress.

Preliminary pit optimization work is continuing and on schedule. Average grades of ore mined during the period of time of the pit optimization are improving and, while below the anticipated long-term grade of the resource, are enhancing tungsten production levels in combination with the improvements to the overall tungsten recovery rate. We anticipate improved production volumes as a result of both improvements in recoveries and higher WO₃ grades in future periods.

Prior to its acquisition by Almonty, the Los Santos Project mined 441,4976 tonnes of ore at an average grade of 0.27% producing approximately 61,599 MTU of WO₃ for an average tungsten recovery of 52.3% for the period from October 1, 2010 to September 30, 2011.

Summary operating information for Daytal¹:

	Three Months Ended June 30, 2012	Nine Months Ended June 30, 2012	Year Ended September 30, 2011
Ore treated (tonnes)	116,166	356,688	441,976
WO ₃ concentrate produced (MTU)	16,144	48,332	61,599
WO ₃ concentrate sold (MTU)	14,986	47,842	52,807
Sales revenue (US\$ million)	4.8	16.1	15.0
Cash operating costs (US\$/MTU)	187	189	193
Ore mined (tonnes)	113,492	347,574	482,968
Average grade WO ₃ mined	0.28%	0.27%	0.32%
Average WO ₃ recovery rate	58.1%	57.1%	52.3%

Average tungsten recovery rates improved significantly following the installation and commissioning of the hydrosizer. The overall average tungsten recovery rate for the month of June was 60.5% and for July it was 60.0%.

¹ Information for the year ended September 30, 2011 is based on the operating results of Daytal under its previous owner, Heemskirk, prior to Daytal being acquired by Almonty.

Three and Nine Month Periods Ended June 30, 2012

During the three months ended June 30, 2012, Almonty mined 113,492 tonnes of ore at a weighted average grade of 0.28% WO₃ (347,574 tonnes of ore at a weighted average grade of 0.27% for the nine months ended June 30, 2012). The Company processed 116,166 tonnes of ore at a weighted average grade of 0.24% WO₃ for a total contained MTU WO₃ processed of 27,786 (356,688 tonnes of ore at a weighted average grade of 0.24% WO₃ for a total contained MTU WO₃ processed of 84,638 for the nine month period ended June 30, 2012). Tungsten concentrate recovery averaged 58.1% and 57.1% for the three and nine month periods ended June 30, 2012, respectively. Almonty shipped 12,586 MTU of high grade concentrate (65.0% or higher WO₃) and 2,400 MTU of low grade concentrate (between 45.0% and 65.0% WO₃) for the three month period ended June 30, 2012 and shipped 42,022 MTU of high grade concentrate (65.0% or higher WO₃) and 5,820 MTU of low grade concentrate (between 45.0% and 65.0% WO₃) for the nine month period ended June 30, 2012.

Gross revenue for the three month period totaled \$4,802 (\$16,251 for the nine month period). Direct selling expenses, consisting of freight, insurance and other transportation services required to deliver product, totalled \$55 for the three month period ended June 30, 2012 (\$162 for the nine month period). Net sales for the three month period ended June 30, 2012 totaled \$4,747 (\$16,089 for the nine month period).

Direct mining costs totalled \$553 and direct processing costs totalled \$1,955 for the three month period ended June 30, 2012. For the nine month period ended June 30, 2012, direct mining costs totalled \$1,929 and direct processing costs totalled \$6,499. Gross profit for the three month period ended June 30, 2012 was \$2,239 (\$7,661 for the nine month period).

General and administrative costs for the three month period ended June 30, 2012 totalled \$857 and included non-cash compensation costs of \$45 relating to the recognition of the vesting of a portion of options previously granted to the Chief Financial Officer of the Company on September 26, 2011 and \$24 in non-cash compensation expense for options granted to certain employees of the Company on June 19, 2012. For the nine month period ended June 30, 2012 general and administration costs were \$2,451 and included non-cash compensation expense of \$221 relating to the vesting of a portion of the options previously granted to the Chief Financial Officer of \$135 and \$86 relating to options granted to certain employees). Other Income (loss) of \$68 for the three month period ended June 30, 2012 and \$145 for the nine month period ended June 30, 2012 consisted of foreign exchange gains on translation of United States dollar revenue into Euros totalled \$77 for the three month period ended June 30, 2012 compared to a gain of \$118 for the nine month period and Other income (loss) for the three month period of (\$9) compared to \$27 for the nine month period.

Other costs included in general and administrative costs include employee salaries and employment related expenses of all non-mining/processing personnel as well as corporate overhead costs, listing and transfer agent fees, accounting, legal and other professional fees and travel.

Depreciation and amortization expense totalled \$1,170 comprised of amortization of \$622 for mining operations based on historical costs and \$548 in amortization charges related to the fair value bump-up in asset values that was recorded when the Company acquired Daytal on September 23, 2011. Total

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

depreciation and amortization for the nine month period was \$3,921 comprised of amortization of \$2,139 for mining operations based on historical costs and \$1,782 in amortization charges related to the fair value bump-up in asset values that was recorded when the Company acquired Daytal on September 23, 2011.

The Company record \$nil in tax expense for both the three and nine month periods as it has sufficient tax loss carry forward amounts that can be utilized to reduce taxable income to zero.

Overall income for the three month period ended June 30, 2012 was \$263 or \$0.01 per common share. Overall income for the nine month period was \$1,390 or \$0.04 per common share.

Cash provided by operating activities totalled \$2,534 for the three month period and \$6,106 for the nine month period.

Cash used in investing activities totalled \$2,583 for the three month period (\$6,485 for the nine month period) and is related to exploration expenses of \$306 (\$654 for the nine month period), additions to plant and equipment of \$789 (\$1,417 for the nine month period) and pit optimization and waste rock movement of \$1,488 (\$4,414 for the nine month period). Pit development costs are capitalized and then amortized based on the units of production method as the current strip ratio is greater than the average strip ratio over the life of the Los Santos Project.

Cash provided by financing activities totalled \$17 for the three month period and consisted of capital lease payments of (\$15) offset by non-cash interest expense of \$17 that was capitalized and gross proceeds from the issuance of common shares on the exercise of 22,488 warrants of \$15. Cash provided by financing activities for the nine month period was \$213 consisting of a new capital lease entered into for the acquisition of vehicles and equipment of \$183 less capital lease payments of (\$29) for a net capital lease amount of \$154, non-cash interest expense of \$44 that was capitalized and gross proceeds of \$15 received from the issuance of common shares on the exercise of 22,488 warrants during the period.

Daytal's contract with Sanchez y Lago ("SYL"), under which SYL carries out contract mining activities for Daytal at the Los Santos Project, was renewed for the life-of-mine with an effective date of July 1, 2012. Daytal currently does not have any mining capabilities of its own and relies on SYL for all mining activity, including waste rock removal, pit development and delivery of ore to Daytal's crushing and processing plant. See Section 10 "Risks and Uncertainties – Operational Risks – Production", in this MD&A for additional details and analysis.

The Company had no interest bearing debt as at June 30, 2012 (\$nil as at March 31, 2012 and \$nil as at September 30, 2011) other than a capital lease obligation relating to several pieces of industrial machinery (front end loader, forklifts etc.) and vehicles totalling \$166 that bear annual interest rates of between 2.75% and 4.50%. Long-term non-interest bearing trade payables of \$513 (\$183 classified as long-term and \$330 classified as current) relates to a non-interest bearing trade payable that matures in November 2013 and requires Almonty to make a payment of \$17 in September 2012 and ongoing monthly instalments of \$43 beginning in October 2012.

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

Three Months Ended June 30, 2012 (Q3 2012) Compared to the Three Months Ended March 31, 2012 (Q2 2012)

Revenues decreased by (\$162) in Q3 2012 compared to Q2 2012 due to a decrease in the price received for finished goods. Sales volumes increased slightly during Q3 over the previous period due to higher production levels of tungsten concentrate during the quarter. The increase in production levels for Q3 2012 were the result of better head grades being mined as the Company works through its pit optimization plans as well as improvements to the tungsten recovery rate during the quarter (58.1% vs. 57.1% for Q2 and 60.5% for the month of June following the addition of a hydrosizer to the processing circuit in May 2012). Almonty is on target with enhancements to its recovery rates which should help improve production volumes in future periods.

Net earnings decreased by (\$117) compared to Q2 2012 as a direct result of decreased revenue from the sale of tungsten concentrate, an increase in depreciation and amortization expense during the quarter as a result of higher volumes of ore processed during Q3 2012 as compared to Q2 2012 and an increase in corporate overhead costs of \$85 over Q2 2012 as a result of higher corporate and business development activities during the quarter.

General and administrative costs for the three months ended June 30, 2012 were in-line with the three months ended March 31, 2012. While the Company experienced higher general and administration costs attributable to its head office operations in the amount of \$85 for Q3 2012 as compared to Q2 2012, this was partially offset by a reduction of \$38 in non-cash compensation expenses during Q3 2012 as a result of fewer incentive stock options being granted to employees during the period.

During the three months ended June 30, 2012 the value of the Euro relative to the Canadian dollar increased from €1.00 = CAD\$1.3322 as at March 31, 2012 to €1.00 = CAD\$1.2910 as at June 30, 2012 resulting in the Company recording a cumulative translation adjustment and other comprehensive loss of (\$623) for the three months ended June 30, 2012. This compares to an increase in the value of the Euro relative to the Canadian dollar for the three month period ended March 31, 2012 that resulted in the recording of an “other comprehensive gain” of \$195 for Q2 2012. These amounts are non-cash and represent the fluctuation in the value of the Company’s ownership of Daytal and the Los Santos Project.

During the three month period ended June 30, 2012, cash flow used in investing activities of \$2,583 (\$2,129 for the three month period ended March 31, 2012) represented a decrease of (\$41) in capital spent on the Company’s drilling exploration program, an increase of \$50 spent on pit optimization and a \$544 increase in the amount spent on equipment to enhance tungsten recoveries as compared to the three month period ended March 31, 2012.

Net operating cash flow for the three months ended June 30, 2012 was \$2,534, representing an increase of \$1,210 as compared to the three months ended March 31, 2012. This increase was a direct result of changes in non-cash working capital balances of \$1,182 compared to balances as at March 31, 2012.

Cash flow from financing during the three month period ended June 30, 2012 totalled \$17 and comprised (\$15) in payments under capital leases offset by \$17 in non-cash interest expenses that were capitalized during the quarter and gross proceeds of \$15 received from the issuance of 22,488 common shares on the exercise of warrants during Q3 2012. This represents an increase of \$16 in cash flow from financing as compared to the previous quarter.

Management Discussion and Analysis
 For the Three and Nine Month Periods Ended June 30, 2012
 Dated August 27, 2012

Liquidity and Capital Resources

As of June 30, 2012 the Company had sufficient cash resources and liquidity to meet its current obligations and to fund working capital requirements and planned capital expenditures in 2012 (see Section 8, “Objectives and Outlook”, in this MD&A for planned drilling and exploration activities and expenditures on both pit optimization and tungsten recovery enhancement projects). The Company had cash and receivables of \$2,786 and non-cash working capital of (\$1,440) as at June 30, 2012. Almonty is presently shipping tungsten concentrate under its long-term supply agreement and to date has received payment for all invoices submitted to its customer. The Company believes that, based on the current price of APT and its forecast production schedule for the remainder of fiscal 2012, that it has the ability to generate sufficient cash flow to meet both its current and long-term obligations. Should the price of APT fall below the Company’s cash operating costs or should the Company no longer be able to produce tungsten concentrate in sufficient quantity then the Company may not be able to meet its current and long-term obligations. Outside of abiding by Spanish law requirements on minimum capital adequacy at Daytal, there is no legal restriction on Almonty’s ability to repatriate capital from Daytal.

The primary objective of Almonty’s capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. Almonty manages its capital structure and makes adjustments to it in light of changes in economic conditions. Almonty may make a dividend payment to shareholders, return capital to shareholders or issue new shares in order to meet its capital management objectives in future periods. Almonty monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Almonty’s policy is to maintain the gearing ratio between 5% and 40%, which is consistent with industry standards. Almonty includes within net debt, interest-bearing loans and borrowings, trade and other payables, less cash and short term deposits and receivables from government tax authorities. Almonty is not exposed to any externally imposed capital requirements.

	June 30, 2012 \$'000	March 31, 2012 \$'000	December 31, 2011 \$'000	September 30, 2011 \$'000
Capital leases	166	186	200	50
Accounts payable and accrued liabilities	5,157	4,754	4,591	4,408
Long-term non-interest bearing trade payables	513	534	502	520
Less cash, short-term deposits and receivables	<u>(2,787)</u>	<u>(3,430)</u>	<u>(3,768)</u>	<u>(2,180)</u>
Net debt	3,049	2,045	1,525	2,798
Shareholders’ equity	21,136	21,412	20,730	21,177
Equity and net debt	<u>24,185</u>	<u>23,457</u>	<u>22,255</u>	<u>23,975</u>
Gearing ratio	12.6%	8.7%	6.9%	11.7%

The Company’s approach to capital management did not change during the period.

 Dated August 27, 2012

Outstanding Share Data

As of the date hereof, there were 37,033,929 common shares outstanding, 1,509,967 options and 4,351,794 warrants outstanding to acquire one common share each.

The Company has established a stock option plan for its directors, officers, employees and technical consultants under which the Company may grant options to acquire a maximum number of common shares equal to 10% of the total issued and outstanding common shares of the Company. As of the date hereof there were 1,459,967 options outstanding under the option plan. The option plan and all grants of options under the option plan were approved by the Company's shareholders at the Company's Annual and Special Meeting of Shareholders held on March 26, 2012.

Almonty owned Daytal for seven days during the period ended September 30, 2011. Prior to the closing of the Qualifying Transaction on September 23, 2011, the Company (then RCG) did not carry on a business and therefore did not have any revenue. Almonty Sub (the accounting acquirer) was incorporated on June 9, 2011 and also did not carry on a business prior to the closing of the Qualifying Transaction and therefore also did not record any revenue for the period ended September 30, 2011. During the one week period following the closing of the Qualifying Transaction, the Company did not

Management Discussion and Analysis
 For the Three and Nine Month Periods Ended June 30, 2012
 Dated August 27, 2012

ship any tungsten concentrate and as such did not record or recognize any revenue during the fourth quarter ended September 30, 2011.

During the quarter ended June 30, 2012, Almonty shipped 12,586 MTU of high grade concentrate (65.0% or higher WO₃) and 2,400 MTU of low grade concentrate (between 45.0% and 65.0% WO₃). During the quarter ended March 31, 2012, Almonty shipped 13,193 MTU of high grade concentrate (65.0% or higher WO₃) and 1,618 MTU of low grade concentrate (between 45.0% and 65.0% WO₃).

Net income for the three months ended June 30, 2012 totalled \$263 compared to net income of \$380 for the three months ended March 31, 2011.

See Section 3 “Financial Highlights”, for additional details on the three and nine month periods ended June 30, 2012 and a comparison of Q3 2012 to Q2 2012.

5. Critical Accounting Estimates

The preparation of Almonty’s consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management’s experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. In particular, information about significant areas of estimation uncertainty considered by management in preparing the consolidated financial statements is described in more detail in Note 3 of the unaudited consolidated interim financial statements of Almonty as at June 30, 2012 and for the three month period then ended.

6. New Accounting Standards and Interpretations

New Accounting Standards and Interpretations Not Yet Adopted

The following standards, amendments to standards and interpretations have been identified as those which may impact the consolidated financial statements of Almonty. They have been issued but are not yet effective and are available for early adoption; however, they have not been applied in preparing the Company’s consolidated financial statements.

Reference	Title	Application date for Almonty
IAS 1	Presentation of Financial Statements (revised)	October 1, 2012
IAS 12	Income Taxes (amended)	October 1, 2012
IFRS 9	Financial Instruments	October 1, 2013
IFRS 10	Consolidated Financial Statements	October 1, 2013

Management Discussion and Analysis
 For the Three and Nine Month Periods Ended June 30, 2012
 Dated August 27, 2012

IFRS 11	Joint Arrangements	October 1, 2013
IFRS 12	Disclosure of Interests in Other Entities	October 1, 2013
IFRS 13	Fair Value Measurement	October 1, 2013
IAS 19	Employee Benefits (revised)	October 1, 2013

The adoption of these new or amended standards is not expected to have a material impact on the consolidated financial statements of Almonty.

7. Related Party Transactions

There were no related party transactions that occurred during the three and nine month periods ended June 30, 2012.

	Three months ended June 30, 2012 \$'000	Nine months ended June 30, 2012 \$'000
Short-term cash compensation	50	150
Long-term directors' incentive share-based compensation	45	135
Total Compensation of Key Management Personnel	95	285

8. Objectives and Outlook

Targeted Improvements in the Company's Tungsten Recovery Rates

Since September 30, 2011, the Company has commenced implementation of operational improvements at the mill operations of the Los Santos Project with the stated goal of increasing tungsten recovery rates to a minimum of 65%, considered to be industry standard. The improvements are being implemented in stages and the Company anticipates having all improvements installed and operational during the fourth quarter of calendar 2012 (period ending December 31, 2012). The Company has a target completion date of December 31, 2012 to improve tungsten recovery to industry standard. Under the previous owner, Heemskirk, the tungsten recovery rate at the Los Santos Project was estimated to be 52% for the 51 week period ended September 23, 2011 prior to Almonty's ownership of Daytal. The Company to date has achieved tungsten recovery rates of approximately 60.5% and anticipates reaching its announced milestone by the target date. The Company is optimizing its processing facility with the addition of new processing circuits and equipment. The Company budgeted US\$1,690 to complete the targeted improvements. As of the date hereof, the Company has spent approximately US\$865 and believes it will be able to meet the milestone within the budgeted amount by the milestone date.

Accelerate the Development and Exploration of the Mine in order to Extend the Mine Life

On October 1, 2011 Almonty embarked on a drilling program at the Los Santos Project, the aim of which is to convert inferred resources into measure and indicated reserves. The exploration program is ongoing and the Company has plans to drill 7,000 metres per year over the next four years as part of the campaign. The Company completed its drill campaign for fiscal 2012 in May after drilling 5,078 metres and is in the process of analyzing the results of the drilling completed to date. Almonty intends to continue the exploration campaign and conduct further analysis of the results with the intention of issuing a revised NI 43-101 compliant technical report once it has collected sufficient data to do so. Almonty intends to release the results of its exploration campaign in due course. The Company intends to complete the current phase of the exploration program by December 31, 2012 (11 months in total, consisting of eight months of drilling plus two months to complete the last laboratory analysis and one additional month to model the information). The total amount budgeted to meet the milestone was set at US\$1,800. The Company commenced drilling in November 2011 and is on track to meet the budgeted time line. To date the Company has spent US\$785 on its drilling program and completed approximately 5,078 metres of drilling. Laboratory analysis of the core samples drilled to date is ongoing.

Focus on Cost Control and Reducing the Cost per MTU of the Final Products

Almonty continues to focus on reducing its overall cash costs per MTU produced in order to remain competitive and to enable the Company to continue being profitable should the price that the Company is paid for its tungsten concentrate fall as a result of a deterioration in the quoted price for APT.

Operational Review and Continued Investment in the Los Santos Project

Under the terms of Almonty's long-term supply agreement it was required to engage the services of a mining consultant to review the status of the Los Santos Project. During the quarter ended March 31, 2012, the Company received a final report from the mining consultant that contained recommendations with respect to areas of improvement and investment that may be required by Almonty in order to provide a level of comfort that Almonty's optimization plans, mining development and exploration programs will be sufficient in order for Almonty to perform its obligations throughout the term of the contract and thereby provide assurance that its customer will have access to the agreed supply of tungsten concentrate over the life of the contract. Almonty has reviewed the findings of the operational review with the mining consultant and its customer. Almonty believes that its current optimization program, enhanced tungsten recovery program and exploration campaign to extend the life of mine will enable it to satisfy its obligations under the long-term supply agreement. Almonty's future capital spending plans may be increased or otherwise altered as a result of ongoing review and discussions with its customer over the life of the supply agreement.

9. Risks and Uncertainties

Risk Factors

The Company operates in the mining industry which is subject to numerous significant risks that can influence profitability. The Company has disclosed several risks below which it believes to be the most significant and that could have a material impact on its current and future operations. Other risks may exist that are not indicated below and which may currently exist or arise at a future date regarding the Company and its operations. For additional and more detailed risk factors, please see the filing statement

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

dated September 14, 2011 filed in connection with the Qualifying Transaction under the heading “Risk Factors – Risks Relating to the Resulting Issuer’s Business and Industry”.

Financial Risks

Price of Metals and Foreign Exchange Rates

The Company’s profitability is exposed to commercial risks, notably those linked to the price of tungsten and foreign exchange rates. The price of tungsten varies considerably and is based on factors outside the control of the Company. Should the market price of tungsten concentrate fall below the Company’s cash operating costs, currently running at US\$187 per MTU, Almonty would cease to generate positive cash flow from operations. In addition, tungsten is quoted on the market in United States dollars and the fluctuation of the United States dollar to the Canadian dollar and the European Euro will have an impact on the future earnings of Almonty. The majority of Almonty’s activities take place outside of Canada. Therefore the Company is subject to the risk of fluctuation in the foreign exchange rate of the Canadian dollar vis-a-vis the other foreign currencies. During the three months ended June 30, 2012 the value of the Euro relative to the CAD\$ decreased from €1.00 = CAD\$1.3322 as at March 31, 2012 to €1.00 = CAD\$1.2910 as at June 30, 2012 resulting in the Company recording a cumulative translation adjustment loss of (\$623) for the three months ended June 30, 2012 (as compared to a gain of \$195 for the three months ended March 31, 2012)

Fluctuation in Interest Rates

Although the Company does not currently have any interest bearing debt, it may in the future become a borrower of funds. If and when Almonty becomes a borrower of funds, the Company will be subject to risks associated with fluctuations in interest rates. The Company’s primary operations are located in Spain and the current European financial crisis that is causing borrowing costs in several European countries to increase may have a negative impact on both the Company’s future borrowing costs and its ability to obtain debt financing. As at June 30, 2012, Almonty did not have any interest bearing long-term debt outside of \$166 in capital lease obligations that carry interest rates between 2.75% and 4.50% with terms to maturity between 2 years and 5 years.

Access to Capital Markets

To fund its future growth plans, the Company may become dependent on securing the necessary capital through loans or permanent capital. The availability of this capital is subject to general economic conditions and lender and investor interest in the Company’s projects. To facilitate the availability of capital, the Company maintains an investor relations program in order to inform all shareholders and potential investors of the Company’s developments.

Future Financing, Credit and Liquidity risk

The success of exploration programs and other transactions related to concessions could have a significant impact on the need for capital. If Almonty decides to develop one of its properties, it must ensure that it has access to the required capital. The Company could finance its need for capital by using working capital, by arranging partnerships or other arrangements with other companies, through equity financing, by taking on long-term debt or any combination thereof.

Almonty’s maximum exposure to credit risk, excluding the value of any collateral or other security, is the credit worthiness of its customers that are operating as counterparty to Almonty’s supplier financing program. All invoices submitted to its major customer under the long-term supply agreement are subject

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

to a supplier finance program. Almonty assigns all trade receivables that are subject to the supplier finance program to a third party bank and receives prepayment from the bank on the invoices assigned. The availability of this program rests solely on the ability of Almonty's customer to continually pay down the supplier financing facility as it comes due in order to ensure Almonty has access to draw on the facility when it ships tungsten concentrate to its customer under the agreement. If Almonty were to no longer have access to the supplier financing program it would revert to normal trade terms with its customer.

Economic Dependency

Daytal, Almonty's wholly-owned indirect subsidiary, has a long-term supply agreement with one customer who participates in the global tungsten business. Currently over 92% of the output of Daytal's operations is sold to this customer. Almonty is economically dependent on the revenue received from this customer in order to be able to meet its current obligations and is subject to the pricing terms set out in the supply agreement. There is no guarantee that Almonty would be able to find an alternative customer or customers on terms similar to its existing supply agreement should the current customer cease operations or become unable to pay Almonty under the current contract.

Operational Risks

Production

Daytal's contract with SYL, under which SYL carries out contract mining activities for Daytal at the Los Santos Project, was renewed for the life of mine with an effective date of July 1, 2012. Daytal currently does not have any mining capabilities of its own and relies on SYL for all mining activity, including waste rock removal, pit development and delivery of ore to Daytal's crushing and processing plant. There is no guarantee that Daytal would be able to replace SYL with another contract mining firm if SYL were no longer able to provide contract mining services to Daytal. Any disruption in the contract mining services provide by SYL would have negative impact on Daytal's short-term economic viability.

Competition

The mining industry is very competitive and the Company has to compete with other companies related to the acquisition of attractive mineral properties and the retention of skilled labour. Many competitors possess greater financial, technical and other resources. As a result, the Company may be faced with a shortage or no supply of ore or employees, as well as not being able to maintain or acquire mineral properties at reasonable conditions.

Risks Related to Property Title

Although the Company leases all of the land of the Los Santos Project from third party property owners as well as the two closest municipalities to the Los Santos Project and the Company has obtained legal opinions on the titles to all of its properties, and although it has taken reasonable measures to ensure that all property titles are valid, there is no certainty that the property titles will not be challenged or questioned. Third parties could have valid claims to the lands occupied by the Company or immediately adjacent to the Company's leased lands.

Dependence on Key Personnel

The Company is dependent on a relatively small number of key employees, of which the loss of any could have an adverse effect on its operations.

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

Laws and Regulations

The Company's exploration and development projects are subject to laws and regulations, including those concerning mining as well as environmental and health and safety matters. The laws and regulations in place are susceptible to change and the impact of any modification is difficult to measure. The Company's policy is to maintain safe working conditions in compliance with applicable health and safety rules.

Licenses and Permits

There can be no guarantees that the Company will be able to obtain or maintain all the necessary licenses and permits to explore, develop, or maintain its continued operations, or that the Company will be able to comply with all the conditions imposed. The current operating permit and plant capacity limitations at the Los Santos Project allows Almonty to process up to 500,000 tonnes of ore per annum. Any increase in available ore or significant increase in the concentration of tungsten contained in the ore may require the Company to expand its production and processing capabilities. There is no guarantee that Almonty would be able to obtain the necessary permits in order to increase production.

Political Risk

The Spanish government currently supports the development of their natural resources by foreign and domestic companies. However, there is no assurance the government will not adopt different policies regarding foreign ownership of mineral resources, taxation, exchange rates, environmental protection, labour relations, repatriation of income or expropriation in the future.

Litigation

All industries, including the mining industry, are subject to legal claims, with and without merit. The Company may in the future be involved in various legal proceedings. While the Company believes it is unlikely that the final outcome of any possible future legal proceedings will have a material adverse effect on the financial position or results of operations, defence costs will be incurred, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation process, there can be no assurance that the resolution of any particular legal proceeding will not have a material adverse effect on the Company's future cash flow, results of operations or financial position.

Risks Linked to Common Shares

The price of the common shares of Almonty may fluctuate for several reasons such as exploration results or operating results and cash flow, exchange rates, available financing, lack of liquidity and several other factors. It is possible that the price of a common share of Almonty may experience significant fluctuations and that such price might be less than the actual price paid by an investor.

10. Disclosure of Internal Controls

Management has established processes to provide them sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the unaudited consolidated financial statements for the three and nine month periods ended June 30, 2012 do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by unaudited consolidated financial statements, and (ii) the unaudited consolidated interim financial statements fairly present in all material respects the financial condition, results of operations and

Management Discussion and Analysis
For the Three and Nine Month Periods Ended June 30, 2012
Dated August 27, 2012

cash flow of the Company, as of June 30, 2012 and for the three and nine month periods ended June 30, 2012.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 – *Certification of Disclosure in Issuers' Annual and Interim Filings* (“**NI 52-109**”), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (“**DC&P**”) and internal control over financial reporting (“**ICFR**”), as defined in NI 52-109. In particular, the certifying officers filing the certificate are not making any representations relating to the establishment and maintenance of:

- (i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- (ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer’s generally accepted accounting principles.

The issuer’s certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in the certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

11. Management’s Responsibility for Financial Statements

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgements and have been properly reflected in the accompanying financial statements.

August 27, 2012

On behalf of Management and the Board of Directors,

“*Lewis Black*”

Director, President and Chief Executive Officer

Glossary of Terms

APT	ammonium para tungstate is an intermediate product which is one of the principal chemical forms in which tungsten is traded
Concentrates	the valuable fraction of an ore that is left after waste material is removed in processing
€	Euros
MB	Metal Bulletin of London
MTU	metric tonne unit equal to 1 percent of a metric tonne, 10kg (22.046 pounds) of contained WO ₃
Scheelite	a brown tetragonal mineral, CaWO ₄ . It is found in pneumatolytic veins associated with quartz, and fluoresces to show a blue color. Scheelite is a mineral of tungsten
Tonne	a metric unit equal to 1,000kg (2,204.6 pounds)
Tungsten concentrates	concentrates generally containing between 40 and 75 percent WO ₃
US\$	United States dollars
W	the elemental symbol for tungsten
WO ₃	tungsten tri-oxide, a compound of tungsten and oxygen
