

## Management's Discussion and Analysis

For the Three and Fifteen-Month Periods  
Ended December 31, 2019

REPORT DATED: May 14, 2020

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

## 1. Introduction

This management's discussion and analysis ("MD&A"), dated May 14, 2020, provides a review of, and discusses the financial position and results of operations of, Almonty Industries Inc. (TSX: AII) ("Almonty" or the "Company") for the three- and fifteen-month periods ended December 31, 2019. It should be read in conjunction with the audited consolidated financial statements of the Company and notes thereto for the fifteen months ended December 31, 2019 (the "**2019 Annual Financial Statements**").

### **Change of Year-End**

During October 2019, the Company, pursuant to Section 4.8(2) of National Instrument 51-102, provided Notice that the Company has determined to change its financial year end from September 30 to December 31 for reporting and planning purposes in order to allow it to complete the audit requirements of its investee companies with greater efficiency and to better align the Corporation's financial reporting periods to that of its peer group in the mineral resources sector, which will allow investors to more easily compare quarterly and annual financial results. As a result, the Company's 2019 Annual Financial Statements are as at and for the fifteen months ended December 31, 2019 with comparatives as at and for the twelve months ended September 30, 2018.

### **Refinancings**

During December 2018, the Company completed a private placement of unsecured convertible debentures with a principal amount of \$2,000.

During September 2019, the Company restructured its existing debt with the UniCredit Bank AG such that the existing Term and Revolving loans with a total principal amount of approximately US\$13,716 were rolled into a new Restated Term Loan with a principal amount of US\$15,650. The Restated Term Loan bears interest at the prevailing Libor rate plus 1.5%, with interest payable quarterly and with principal repayable at maturity. The maturity date for the Restated Term Loan is September 30, 2020 with the ability to extend the loan maturity date each year over a three-year period to September 30, 2023.

During September 2019, approximately US\$2,221 that was included in accounts payable and accrued liabilities, US\$687 that was included in deferred revenue as well as a US\$173 convertible debenture, were converted into an unsecured loan payable bearing an effective rate of interest of 7.74% with quarterly principal and interest payments due, maturing June 30, 2022.

During November 2019, the Company negotiated the extension of the \$2,000 Deutsche Rohstoff AG ("DRAG") unsecured convertible debenture (with a maturity date of December 31, 2019) and the two US\$1,000 DRAG promissory notes (with maturity dates of January 1, 2020 and January 26, 2020, respectively) to March 22, 2021.

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

### **Subsequent events**

Subsequent to December 31, 2019, the Company entered into the following transactions:

- 1) issued 747,244 units at \$0.635 per unit pursuant to the closing of the third of three tranches of a non-brokered private placement, receiving gross proceeds of \$474 (Note 1 of the 2019 Annual financial statements). Each unit was comprised of one common share and one share purchase warrant with each warrant exercisable into one common share at a price of \$0.75 per share;
- 2) received US\$1,000 (Cdn\$1,320) pursuant to a promissory loan which bears interest at the rate of 6% per annum and matures in January 2021;
- 3) received US\$2,000 (Cdn\$2,680) pursuant to the issuance of a convertible debenture which bears interest at the rate of 7%, is convertible at US\$0.50 per share and matures in March 2021; and
- 4) negotiated the amendment of a convertible debenture with a principal amount of \$5,963, whereby the maturity date of January 31, 2020 was extended to January 30, 2021 and the conversion price was amended from \$1.00 to \$0.90 per share (Note 8(d)(ii) of the 2019 Annual financial statements);
- 5) received a binding commitment letter in January 2020 for US\$76 million from the KfW-IPEX Bank for the proposed project financing for the development and operation of the Company's Sangdong Mine located in South Korea. As of December 31, 2019, deferred financing costs totaling \$1,247 have been incurred in conjunction with this financing;
- 6) made the decision in February 2020 to put the Los Santos Mine on care and maintenance so as to allow the Company to focus its efforts on finalizing the proposed project financing for the Sangdong Mine and to assess and complete a restructuring initiative that will involve an approximate EUR 1 million capital expenditure.

The Company's management is responsible for the preparation of the Company's consolidated financial statements as well as other information contained in this MD&A. The board of directors of Almonty (the "**Board of Directors**") is required to ensure that management assumes its responsibility in regard to the preparation of the Company's financial statements. To facilitate this process, the Board of Directors has created an audit committee (the "**Audit Committee**"). The Audit Committee meets with members of the management team to discuss the operating results and the financial results of the Company, before making their recommendations and submitting the 2019 Annual Financial Statements and MD&A to the Board of Directors for review and approval. Following the recommendation of the Audit Committee, the Board of Directors approved the 2019 Annual Financial Statements and this MD&A on May 13, 2020.

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

The 2019 Annual Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

All currency figures in this MD&A appear in thousands of Canadian dollars, except per share amounts, unless otherwise stated.

Additional information about the Company, including the 2019 Annual Financial Statements, is available on the Company’s website at [www.almonty.com](http://www.almonty.com) and on SEDAR ([www.sedar.com](http://www.sedar.com)) under Almonty’s profile.

### **Forward-Looking Information**

This MD&A contains forward-looking statements that reflect management’s expectations, estimates and projections concerning future events in relation to the Company’s business and the economic environment in which it operates. Forward-looking statements may include, but are not limited to, statements with respect to possible acquisitions, demand for tungsten, tungsten prices, tungsten recovery and production, reductions in operating and unit production costs, improvements in efficiencies or reduction in dilution, future remediation and reclamation activities, future mineral exploration, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing of activities and the amount of estimated revenues and expenses, the success of exploration activities, permitting time lines, the success of mine development and construction activities, the success of future mine operations, the success of other future business operations, requirements for additional capital and sources and uses of funds. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “expects”, “anticipates”, “plans”, “estimates”, “intends”, “strategy”, “goals”, “objectives” or stating that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be “forward-looking statements”.

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events, results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, but are not limited to, the inability of the Company to maintain its interest in its mineral projects or to obtain or comply with all required permits and licenses, risks normally incidental to exploration and development of mineral properties, uncertainties in the interpretation of drill results, the possibility that future exploration, development or mining results will not be consistent with expectations, changes in governmental regulation adverse to the Company, lack of adequate infrastructure at the mineral properties, economic uncertainties, the inability of the Company to obtain additional financing when and as needed, competition from other mining businesses, the future price of tungsten and other metals and commodities, fluctuation in currency exchange rates, title defects and other related matters. See Section 7 in this MD&A and under the heading “Risk Factors” in the Company’s Annual Information Form dated May 14, 2020 for a further discussion of factors that could cause the Company’s actual results, performance or achievements to be materially different from any anticipated results, performance or achievements expressed or implied by forward-looking statements. The forward-looking statements in this MD&A represent the expectations of management as of the date hereof and accordingly, are subject to change after such date. Readers should not place undue importance on forward-looking statements and should not rely

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

upon these statements as of any other date. The Company does not undertake to update any forward-looking information, except as, and to the extent, required by applicable laws. The forward-looking statements contained herein are expressly qualified by this cautionary statement.

A glossary of terms is affixed to the last page of this MD&A. Capitalized terms used but not otherwise defined herein have the respective meanings ascribed thereto in the glossary of terms.

### **Corona Virus (“COVID-19”) Discussion**

In March 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak and any related adverse public health developments may adversely affect workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.

## 2. Overview

Almonty is a publicly traded company listed on the Toronto Stock Exchange (the “**TSX**”) (formerly listed on the TSX Venture Exchange (the “**TSXV**”), under the symbol “**AII**” (see TSX Listing section below). The principal business of Almonty is the mining, processing and shipping of tungsten concentrate from the Los Santos tungsten mine located near Salamanca, Spain (the “**Los Santos Mine**”), the processing and shipping of tungsten concentrate from the Panasqueira tin and tungsten mine in Covilha, Castelo Branco, Portugal (the “**Panasqueira Mine**”), as well as the evaluation of the Sangdong tungsten mine project located in Gangwon Province, Republic of Korea (the “**Sangdong Mine**”) and the evaluation of the Valtreixal tin and tungsten mine project located in Western Spain in the province of Zamora (the “**Valtreixal Mine**”).

The Los Santos Mine was acquired by Almonty in September 2011 and is located approximately 50 kilometers from Salamanca in western Spain and produces tungsten concentrate. The Panasqueira Mine, which has been in production since 1896 and is located approximately 260 kilometers northeast of Lisbon, Portugal, was acquired in January 2016. The Sangdong Mine, which was historically one of the largest tungsten mines in the world and one of the few long-life, high-grade tungsten deposits outside of China, was acquired by Almonty in September 2015. Almonty also owns a 100% interest in the Valtreixal Mine in northwestern Spain, having exercised its option to acquire the remaining ownership in the Valtreixal Mine on December 21, 2016.

During February 2020, the Company made the decision to put the Los Santos Mine on care and maintenance so as to allow the Company to focus its efforts on finalizing the proposed project financing for the Sangdong Mine and to assess and complete a restructuring initiative that will involve an approximate EUR 1 million capital expenditure expected to lead to a significant increase in the recovery rate of WO<sub>3</sub> from the processing of the Company's tailings inventory.

Almonty acquired 100% of the share capital of Wolfram Camp Mining Pty Ltd (“**WCM**”) and Tropical Metals Pty Ltd (“**TM**”) (which collectively own a 100% interest in the Wolfram Camp Mine) from Deutsche Rohstoff AG (“**DRAG**”) on September 22, 2014. Production at the Wolfram Camp Mine had been suspended during the period of time that Almonty had been refurbishing the mill. However, during

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

the fifteen-month-period ended December 31, 2019, the Board of Directors determined that it was in the best interests of the Company to cease expending further funds towards refurbishment and, consequently, the Company caused WCM and TM to be placed into voluntary liquidation with all requisite approvals received. As a result, the Company de-consolidated WCM from its consolidated financial statements on December 4, 2019.

On June 4, 2015, Almonty acquired an 8% interest in Woulfe Mining Corp. (“**Woulfe**”) and, through the acquisition of convertible debentures in Woulfe, gained control over Woulfe with the ability to nominate a majority of the board members. On July 7, 2015, Almonty and Woulfe entered into an arrangement agreement (the “**Arrangement Agreement**”) in respect of the acquisition by Almonty of all of the issued and outstanding shares of Woulfe that it did not already own by way of a plan of arrangement under the *Business Corporations Act* (British Columbia) (the “**Plan of Arrangement**”). On August 21, 2015, Woulfe shareholders approved the Plan of Arrangement. On September 10, 2015, Almonty completed the Plan of Arrangement and acquired all of the shares of Woulfe that it did not already own, leading to Almonty having a 100% ownership interest in Woulfe. The principal asset of Woulfe is the Sangdong Mine.

On January 6, 2016, Almonty acquired 100% of the issued and outstanding shares of Beralt Ventures Inc. (“**BVI**”) from Sojitz Tungsten Resources Inc. for €1.00. In connection therewith, Almonty acquired and purchased €12,260 in aggregate principal amount of debt owed by Beralt Tin & Wolfram (Portugal), S.A. (“**Beralt**”), a wholly-owned subsidiary of BVI, to Sojitz Corporation of Japan in exchange for a cash payment of €1,000 on closing and a promissory note issued by Almonty in the principal amount of €500, bearing interest at 4% per annum, maturing December 29, 2017 (paid) (the “**January 2016 Note**”). BVI, through its wholly owned subsidiaries, is the 100% owner of the Panasqueira Mine.

On December 21, 2016, Almonty exercised its option to acquire the remaining 49% of the Valtreixal Mine it did not already own for payment of €1.5 million (\$2.2 million). Almonty now owns a 100% interest in the Valtreixal Mine.

### **TSX listing**

Almonty received final approval from the TSX to graduate the listing of its common shares from the TSXV to the TSX after fulfilling certain standard and customary conditions required by the TSX. Upon completion of the final listing conditions on June 1, 2018, Almonty's common shares were simultaneously delisted from the TSXV and began trading on the TSX.

### **OTCQX listing**

On July 12, 2018, the Company began trading in the United States on the OTCQX Best Market (“**OTCQX**”) under the symbol ALMTF. U.S. investors can find current financial disclosure and real-time Level 2 quotes for the Company on the OTCQX website.

Further information about the Company's activities may be found at [www.almonty.com](http://www.almonty.com) and under the Company's profile at [www.sedar.com](http://www.sedar.com)

### Market for Tungsten Concentrate

Market demand for tungsten concentrate continued to be stable from the fourth quarter of fiscal 2017 and through to Q5 2019 with the pricing environment improving each quarter to May 2019 and leveling off thereafter between July 2019 and December 2019. Current Spot APT price is approximately US\$220 per MTU, with a high of US\$350 per MTU of APT during the month of June 2018. Management expects that the limited quantities of “spot” concentrate available in the market will help with continued price improvement in the near to mid-term with several forecasting services projecting prices to reach or exceed US\$300 per MTU of APT by mid to late 2020.

The average of the high and low weekly quoted price for European APT according to the Metal Bulletin (“MB”) European weekly quotation for APT (from which Almonty’s concentrate prices are derived by the formulae under its Supply Agreements) averaged the following:

Three Months ended	Tungsten APT European Average High -Low US\$/MTU	Year ended	Tungsten APT European Average High -Low US\$/MTU
31-Dec-15	\$178		
31-Mar-16	\$172		
30-Jun-16	\$207		
30-Sep-16	\$190	30-Sep-16	\$184
31-Dec-16	\$194		
31-Mar-17	\$204		
30-Jun-17	\$217		
30-Sep-17	\$267	30-Sep-17	\$220
31-Dec-17	\$288		
31-Mar-18	\$324		
30-Jun-18	\$350		
30-Sep-18	\$282	30-Sep-18	\$311
31-Dec-18	\$275		
31-Mar-19	\$270		
30-Jun-19	\$269		
30-Sep-19	\$210		
31-Dec-19	\$242	31-Dec-19	\$253

Source: Metal Bulletin, ammonium para tungstate (APT), European (US\$/MTU).

Almonty prices its tungsten concentrate product (on volumes of material that are not subject to a fixed price contract) in relation to the prior month’s average weekly quoted price for APT on the MB European quotation service and the Metal Pages pricing service.

### Los Santos Mine

MTU production during the three months ended December 31, 2019 (“Q5 2019”) decreased by 83.7% when compared to the three months ended December 31, 2018, (“Q1 2019”) as a result of the fact that the

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

Company has changed its mine plan at Los Santos, whereby it ceased further mining of ore and commenced processing of its tailing during Q3 2019.

During February 2020, management implemented a planned closure of Daytal's operations by placing it into care and maintenance. This was done for two main reasons: 1) The Company is planning to re-open operations in late 2020 once it has finalized plans to modify the plant's infrastructure, through a EUR one million capital expenditure, which is expected to result in significantly higher recovery rates from the future processing of its tailings inventory; and 2) the Company intends to use the short-term freed-up capital to assist with finalizing the Sangdong Mine's project financing.

### **Panasqueira Mine**

Almonty acquired the Panasqueira Mine on January 6, 2016.

During Q3 and Q4 2019, management at Panasqueira determined that it would mine certain ore with a lower grade so as to enable work to be done to ensure that access to ore with the usual higher grade will be accessible into the future. The tungsten recovery rate continued to improve during Q4 and Q5 2019 when compared to Q1 2019 and Q4 2018 and is now in line with the expected average tungsten recovery rate for the life of mine, expected to be maintained in the 60-65% range.

Almonty continued its focus on cost reduction and all-in production costs at Panasqueira continued to decrease. Mined grades continued to improve throughout Fiscal 2018 and in to Q5 2019 as expected under the revised mine plan implemented by Almonty since its acquisition in January 2016. Mined grades in Q5 2019 continued to show improvement in the content of by-product payable metals as well (copper and tin) which are improving the overall cash flow profile of the mining operation.

Panasqueira is a poly-metallic wolframite deposit as opposed to a skarn deposit scheelite mine like Los Santos. Tungsten recovery rates for wolframite deposits are typically higher than for scheelite deposits. The Panasqueira Mine has some of the highest tungsten recovery rates in the industry, consistently averaging 80%.

Almonty anticipates that the grades of ore mined will continue trending towards the long-term average of the remaining life of mine of 0.185% (see NI 43-101 technical report on the Panasqueira Mine dated December 31, 2016 filed on SEDAR under Almonty's profile, also available on the Company's website [www.almonty.com](http://www.almonty.com)) through the refinement of the life of mine plan. The expected increased grades are continuing to have an impact on the level of production currently being experienced and the increase in contained tungsten is also having a positive impact on unit costs as at the date of this MD&A.

On May 15, 2017, the Company announced that it had entered into an agreement with Crominet Mining Processing SA (PTY) Ltd ("**Crominet**") whereby Crominet will install and operate a series of XRT ore sorting and other ancillary equipment with sufficient capacity to treat all of the tailings generated by Panasqueira's heavy media separation unit. The installation of the XRT ore sorting equipment is expected to increase the overall tungsten recovery rate at the mine by 10%. The XRT ore sorting installation is progressing well and is expected to be operational by the third quarter of calendar 2020.

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

### **Valtreixal Mine**

During Q1 2017, Almonty exercised its option to acquire the remaining 49% interest in the project for a payment of €1.5 million (\$2.2 million) in December 2016, a reduction of €0.75 million (\$1.1 million) from the previously agreed price, resulting in a much-needed saving of capital on the acquisition. The Company is continuing to carry out work on the project and is working towards a final decision on proceeding with the development of the project. The Company continues to fine-tune its planning and budgeting for the potential build-out and commissioning of the Valtreixal Mine.

### **Sangdong Mine**

On August 29, 2016, Almonty completed an updated technical report prepared pursuant to NI 43-101 entitled "Technical Report on the Mineral Resources and Reserves of the Sangdong Project, South Korea" (the "**Sangdong Technical Report**") that is available under Almonty's profile on SEDAR ([www.sedar.com](http://www.sedar.com)) and on the Company's website ([www.almonty.com](http://www.almonty.com)).

On December 28, 2017, Almonty entered into an engineering, procurement and construction ("EPC") contract with POSCO E&C for the development work at the Sangdong Mine. POSCO E&C is one of the top tier general contractors in Korea and a subsidiary of the third largest steel company in the world.

The EPC contract is a turnkey based contract for the development and construction of primary facilities for processing tungsten ore mined out of the Sangdong Mine. Under the EPC contract, POSCO E&C is responsible for not only engineering, civil & architectural, machinery & electrical works of processing plant and auxiliary facilities, but also commissioning of such facilities. The EPC contract has a net contract price of KRW40.3 billion (approx. US\$37.3 million) and, including the value of primary equipment which will be erected and installed by POSCO E&C, the EPC price reaches KRW54.0 billion (approx. US\$50.0 million) which accounts for 65% of the total capital expenditure budgeted for the Sangdong Project. The remaining 35% will be spent for the development of underground transportation galleries and accesses to tungsten veins, mine infrastructure, backfill plant, owner's cost, and other expenses. The primary facilities of the processing plant will be built for 900,000 to 1.2 million tonnes per annum capacity while the initial years of operation targets 640,000 tonnes per annum. The EPC contract stipulates a construction period of 18 months and commissioning period of 6 months. Following general rules of EPC contracts, cost overrun, and project delay will be the responsibility of the EPC Contractor.

On March 12, 2018, Almonty entered into a new off-take agreement with an existing customer for the tungsten concentrate to be mined and processed at the Sangdong Mine. The agreement has a term of 10 years and, based upon current pricing models and subject to the terms and conditions of the agreement, the agreement calls for revenues for the Company for a minimum of \$500-million over a 10-year period (subsequently amended to increase the term to 15 years for a minimum of \$750-million over a 15-year period).

The realization of the benefits of the off-take agreement are subject to risk factors typical of a supply agreement of this nature, including if the Company is unable to meet its obligations to deliver tungsten concentrate in accordance with the terms of the off-take agreement, variable costs of shipping and production over the term of the contract, the customer's ability to purchase the tungsten concentrate produced by Almonty at the mine, and the continued economic viability of the customer or its successors

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

for the life of the off-take agreement. Finally, given these risks, there is no guarantee that the Company will realize the revenues contemplated under the terms of the off-take agreement.

Almonty has announced that it has obtained the clearance and acceptance by the Lending Bank, **KfW-IPEX Bank**, of the final technical due diligence report on the Sangdong Mine Development Project submitted by the Independent Engineer. The final acceptance of the Independent Engineer's report signifies the clearance of certain pending issues related to compliance with the Equator Principles.

During January 2020, the Company received a binding commitment letter for US\$76 million from the KfW-IPEX Bank for the proposed project financing for the development and operation of the Company's Sangdong Mine located in South Korea.

The general terms of the binding commitment approved by the credit committee of KfW-IPEX include:

1. The principal amount of senior project finance loan to be US\$76 million;
2. Interest rate -- three-month London interbank offered rate (LIBOR), plus 2.5 per cent, and borrower expects this to reduce on issuance of the ECA cover;
3. Term of 6.25 years with an initial principal repayment holiday during construction and quarterly instalment repayments of principal commencing after the second anniversary of the initial drawdown;
4. Oesterreichische Kontrollbank AG (OeKB) is committed to providing an import credit scheme cover guarantee based on the previously announced long-term offtake agreement, which was issued in February 2020.

and, therefore, the project is now moving forward to the next stage of financial closure.

Almonty has worked closely with the Independent Engineer in the past several months to ensure sustainable development outcomes and the integration of environmental, safety and social considerations into the project development procedures, meeting the stringent international standards and guidelines.

Almonty also announced the mechanical completion and the commencement of commissioning of the government-subsidized pilot plant at the site.

The project financing commitment is now subject to the execution of definitive loan and security documentation. In the meantime, work is continuing at the Sangdong site to ensure the timely commissioning as requested by Almonty's customer under the previously announced off-take agreement for the Sangdong Mine.

## **Financial Highlights**

The following financial information is for the periods from October 1, 2018 to December 31, 2019, October 1, 2017 to September 30, 2018, and October 1, 2016 to September 30, 2017:

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

### **Three Months Ended December 31, 2019 (“Q5 2019”) Compared to the Three Months Ended December 31, 2018, (“Q1 2019”)**

Gross revenue for Q5 2019 was \$6,602 (\$16,412 for Q1 2019). Production volumes decreased by 60.6% when compared to Q1 2019. Production decreased by 83.7 % at the Los Santos mine and decreased by 33.5% at the Company's Panasqueira mine. Decreased overall production at the Los Santos mine was a result of processing tailings inventory with a lower than expected recovery rate. Decreased overall production at the Panasqueira mine was a result of i) mining lower grade ore so as to enable planned underground maintenance to ensure continued mining of higher-grade ore into the future and ii) reduced amount of ore mined and processed during Q5 2019 when compared to Q1 2019. Shipment volumes decreased by 65.3% overall in Q5 2019 when compared to Q1 2019. Overall revenue decreased by \$9,810 or 59.8% in Q5 2019 when compared to Q1 2019 because of a marked decrease in the volume of units produced and shipped as well as by a moderate drop in the selling price of the units shipped when compared to Q1 2019. The average commodity price experienced during Q5 2019 was 12% lower than the average commodity price in Q1 2019.

Mine production costs for Q5 2019 (including direct mining costs, milling costs, tailings costs and waste rock stripping costs associated with current production increased by 5.8%, or \$516, when compared to Q1 2019. This increase resulted mainly from lower than expected recovery rates at the Company's Los Santos mine when compared to Q1 2019.

The Company carries out a quarterly assessment of its ore and in-process ore and finished goods inventory as well as its stockpiles of long-term tailings inventory to ensure that the carrying is recorded at the lower of cost and net realizable value. Any adjustments to the carrying value of ore, in-process ore and finished goods inventory are included in costs of goods sold (mine production costs). No write-downs of finished goods inventory were recognized during Q5 2019 or Q1 2019. Any adjustment to long-term tailings inventory that is recognized as an impairment amount is expensed through the statement of operations as an addition to Mine production costs. Conversely, any adjustment to long-term tailings inventory that is recognized as a reversal of prior period impairment charges is recorded as a reduction in Mine production costs. Reversals may occur in future periods as a result of continued increases in the expected price of an MTU of APT in future periods.

During Q5 2019, the Company recorded an impairment of its tailings inventory of \$5,768 and an impairment of its property, plant and equipment and its mineral property acquisition and development costs at Daytal of \$3,287 and \$1,057, respectively, (see “Impairment Loss on Mining Assets” section below).

Depreciation and amortization expense for Q5 2019 decreased by 95.2%, or \$1,553 when compared to Q1 2019 due to a change in the Company's mine plan at Los Santos during the year ended September 30, 2018. Almonty employs a unit-of-production basis for recording depreciation and amortization. (See Note 3 of the Company's Q5 2019 Financial Statements for additional information).

Loss from mining operations during Q5 2019 was \$17,097 (which included a non-cash impairment charge of \$10,112), a decrease of \$17,552 over income from mining operations in Q1 2019 of \$455.

General and administrative costs increased by \$1,125 or 61.3% during Q5 2019 when compared to Q1 2019. General and administrative costs include employee salaries and employment-related expenses of all non-mining/processing personnel as well as corporate overhead costs, business development and corporate

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

development costs, listing and transfer agent fees, accounting, legal and other professional fees and travel. The increase was mainly a result of the recognition of certain legal and non-income tax contingent liabilities.

Interest expense decreased by 25.1%, or \$163, during Q5 2019 when compared to Q1 - 2019 as a direct result of lower interest rates on the Company's LIBOR based bank loans, offset by an unfavorable foreign exchange rate change during the period as well as an increase in long-term debt.

Foreign exchange losses (gains) on the revaluation of interest-bearing long-term debt and non-interest-bearing trade payables denominated in United States dollars of (\$1,690) were incurred during Q5 2019 due to the appreciation of the Canadian dollar versus the United States dollar. This compared to a foreign exchange loss of \$1,411 in Q1 2019.

Net Income (loss) for Q5 2019 was (\$14,296) or \$0.08 loss per common share. This compares to net income of 7,257 or \$0.04 per common share, for Q1 2019. This variance was mainly due to the fact that the Company recorded a non-cash impairment charge in Q5-2019 of \$10,112

Cash provided by (used in) operating activities totaled \$5,343 and \$1,630 for Q5 2019 and Q1 2019, respectively.

Cash provided by (used in) investing activities totaled (\$3,211) for Q5 2019 ((\$1,587) for Q1 2019). These amounts relate to capitalized stripping costs at the Company's Los Santos Mine and capitalized exploration and evaluation expenditures related to the Company's Sangdong mine project in Korea offset by proceeds received pursuant to a note receivable and to the disposition of assets.

Cash provided by (used in) financing activities totaled (\$3,495) during Q5 2019 and was comprised of a change in long-term debt. Cash (used in) provided by financing activities during Q1 2019 was \$386, consisting mainly of the issuance of long-term debt.

**Fifteen Months Ended December 31, 2019 ("F19") Compared to the twelve Months Ended September 30, 2018 ("F18")**

The variance analysis presented below discusses factors other than the natural variance caused by comparing a 15-month period to a 12-month period:

Gross revenue for F19 was \$54,634 (\$65,171 for F18). Production and shipment volumes were down 19.6% and 14.7%, respectively, in F19 when compared to F18 mainly as a result of moving to tailings processing at Daytal in Q3-2019, and a decline in APT selling pricings throughout the period.

Mine production costs during F19 (including direct mining costs, milling costs, tailings costs and waste rock stripping costs associated with current production) increased by \$1,495 (or 4.1%) when compared to F18.

Depreciation and amortization expense for F19 decreased by 59.8% compared to F18 due to a change in the Company's mine plan during the year ended September 30, 2018. Almonty employs a unit-of-

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

production basis for recording depreciation and amortization. (See Note 3 of the Company's 2019 Annual Financial Statements for additional information.)

Income from mining operations was \$1,841 during F19 (after recognizing an impairment charge of \$10,112 and depreciation expense of \$4,487), an improvement of \$128 when compared to income from mining operations of \$1,713 in F18 (after recognizing an impairment loss of \$15,604 and depreciation expense of \$11,155), due to the addition of more cost-efficient production from the Company's Panasqueira mine.

General and administrative costs increased by \$1,698 (or 20.2%) in F19 when compared to F18. General and administrative costs include employee salaries and employment-related expenses of all non-mining/processing personnel as well as corporate overhead costs, business development and corporate development costs, listing and transfer agent fees, accounting, legal and other professional fees and travel.

Foreign exchange gains (losses) on the revaluation of interest-bearing long-term debt and non-interest-bearing trade payables denominated in United States dollars of \$1,785 were incurred during F19. This compared to a foreign exchange gain of \$95 in F18. This variance was due to the appreciation of the Canadian dollar versus the United States dollar.

The Company also recognized a deferred tax provision of \$13 in F19 compared to a deferred tax provision of \$490 in F18.

Net income (loss) for F19 was (5,233) or (\$0.03) loss per common share. This compares to a loss of (\$10,689) or (\$0.06) loss per common share, for F18.

Cash provided by (used in) operating activities totaled \$4,210 and \$10,940 for F19 and F18, respectively.

Cash (used in) investing activities totaled (\$7,798) for H5 2019 ((\$6,023) for H4 2018). These amounts relate largely to the capitalized stripping costs at the Company's Los Santos Mine recorded in Q1- and Q2-2019 and capitalized exploration and evaluation expenditures related to the Company's Sangdong Mine project in Korea offset by proceeds received pursuant to a note receivable and to the disposition of assets.

Cash (used in) provided by financing activities totaled (\$3,556) and (\$540) for F19 and F18, respectively, and was comprised of principal repayments on existing debt and proceeds from new borrowings and from equity financings.

### **Impairment Loss on Mining Assets**

In accordance with the Company's accounting policy, operating mines are evaluated for indicators of impairment. Where indicators of impairment are present, such as when events or changes in circumstances suggest that the carrying amount of the operating mines may not be recoverable, the Company will test for impairment. The Company generally uses a discounted cash flow model to determine the value in use (VIU) for its operating mines where there are indicators of impairment. The assessment is done at the cash generating unit level ("CGU") level, which is the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets. A CGU is generally an individual operating mine and its related long-term assets. An impairment loss is recognized when the carrying amount of the CGU exceeds the recoverable amount.

Management's Discussion and Analysis  
 For the Three and Fifteen-Month Periods Ended December 31, 2019  
 Dated May 14, 2020

*Daytal*

During fiscal 2018, the Company changed its life of mine plan for the Daytal CGU and planned to complete mining of the remaining ore in the third quarter of fiscal 2019 and commence reprocessing of tailings at that time. As a result, the Company recognized an impairment loss of \$2,847 for the year ended September 30, 2018, to write down certain pit development and stripping costs included in mineral property acquisition and development costs related to pits that will no longer be mined. In addition, Management considered the changes to the life of mine plan to be an indicator of impairment. Accordingly, the recoverable amount of the Daytal CGU was determined based on the value in use (VIU).

The VIU for the Daytal CGU was determined based on the net present value of the future cash flows expected to be generated from mining the remaining ore and processing the tailings using the most recent life of mine plans. Future tungsten prices are estimated based on observable market or publicly available data to estimate future revenues and operating costs are estimated based on current costs adjusted for anticipated changes. The future cash flows were discounted using a comparable discount rate for similar assets with the same market risk factors.

During fiscal 2019, the Company completed mining of the remaining ore and commenced reprocessing the tailings. During the period in which tailings were reprocessed the Company achieved WO3 recovery rates below those previously estimated and, as a result, recorded an impairment of tailings inventory of \$5,768 representing an adjustment to the lower of cost and net realizable value. In addition, Management considered the lower recovery rates to be an indicator of potential impairment. Accordingly, the recoverable amount of the Daytal CGU was determined based on the fair value less costs to sell (FVLCS).

The FVLCS for the Daytal CGU was determined based on the net present value of the future cash flows expected to be generated from processing the tailings and incorporated cash flows associated with improvement capital expenditures. Future tungsten prices are estimated based on observable market or publicly available data to estimate future revenues and operating costs are estimated based on current costs adjusted for anticipated changes. The future cash flows were discounted using a comparable discount rate for similar assets with the same market risk factors.

As a result of the impairment test performed, impairments of \$3,287 and \$1,057 were recorded to property, plant, and equipment and mineral property acquisition and development, respectively, based on the estimated fair value less costs of disposal of the remaining property, plant, and equipment at the mine.

The key assumptions used in these impairment tests as at December 31, 2019 and September 30, 2018 are summarized as follows:

	<b>2019</b>	<b>2018</b>
Future tungsten prices, per MTU	US\$237 - US\$282	US\$300 - US\$320
Discount rate - Daytal, Spain	9%	7%
Life of mine – Daytal, Spain	7 years	8 years

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

## **Liquidity and Capital Resources**

As at December 31, 2019, the Company had cash and receivables of \$3,276 (September 30, 2018 - \$13,355) and a working capital deficiency of \$40,344 (September 30, 2018 - \$28,622). The Company believes that, based on the current price of APT and its forecast production schedule for the balance of fiscal 2020, it has the ability to generate sufficient cash flow to meet its current obligations at its producing mines. The Company will, however, need to refinance various long-term debt facilities that are coming due in the current year and raise additional capital to complete the development and build-out of the Sangdong Mine. The current price of APT has reached levels where it is sufficient to cover the Company's cash operating costs on existing production volumes. Should the Company no longer be able to produce tungsten concentrate in sufficient quantity, then the Company may not be able to meet its current and long-term obligations. Outside of abiding by (i) Spanish law requirements on minimum capital adequacy at Valtreixal Resources Spain SL, Daytal Resources Spain SL, (ii) Korean law requirements on minimum capital adequacy at Almonty Korea Tungsten, and (iii) Portuguese law requirements on minimum capital adequacy at Beralt Tin and Wolfram (Portugal) SA, there is no legal restriction on Almonty's ability to repatriate capital from its subsidiaries.

The Company has \$49,499 in long-term debt as at December 31, 2019 (\$50,331 as at September 30, 2018), of which \$33,763 is the current portion (\$25,876 as at September 30, 2018), comprised of individual facilities with Spanish domiciled banks, one facility with a US subsidiary of an Austrian bank, a promissory notes owed to a shareholder and convertible debentures as at December 31, 2019. See Note 8 in the Company's 2019 Annual Financial Statements for additional details regarding each component of long-term debt.

On December 18, 2018, the Company completed a non-brokered private placement of an unsecured convertible debenture with a principal amount of \$2,000, which debenture was acquired by DRAG. The debenture was to mature on December 31, 2019 (amended to March 22, 2021) and bears interest at a rate of 6.0% per annum, payable semi-annually. Almonty may elect to convert the debenture into common shares upon the availability to the Company of full funding for the Sangdong Mine project at a conversion price equal to the higher of (a) the price per share in any equity financing completed by the Company after the date of issuance of the debenture and prior to the conversion or the maturity date of the debentures for purposes of financing the Sangdong Mine project and \$0.628. However, the Company may not convert the debentures if at any time the Company's shares trade below \$0.628 per share or if such conversion would result in DRAG holding more than 19.9% of the Company's issued and outstanding common shares.

During Q1 2019, the Company and DRAG agreed to an extension of the maturity date of its convertible debentures described in note 8(d)(iv) and Note 18 of the 2019 Annual financial statements.

For discussion regarding additional financings, please see Refinancings and Subsequent events sections above.

Management's Discussion and Analysis  
 For the Three and Fifteen-Month Periods Ended December 31, 2019  
 Dated May 14, 2020

### Summary of Long-term Debt

	<b>December 31,</b>	<b>September 30,</b>
	<b>2019</b>	<b>2018</b>
Term loans - Euro	8,204	14,370
Term and other loans - US dollar	26,126	23,186

<b>Total Contractual obligations</b>	<b>33,952</b>	<b>15,223</b>	<b>744</b>	<b>-</b>	<b>49,919</b>

### Summary of Gearing Ratio

The primary objective of Almonty's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company manages its capital structure (composed of shareholders' equity and net debt) and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, Almonty may provide a dividend payment to shareholders, return capital to shareholders or issue new shares. Almonty monitors capital using a gearing ratio, which is net debt, divided by equity plus net debt. Almonty's policy is to maintain the gearing ratio between 5% and 40%. Net debt for this purpose includes interest-bearing loans and borrowings and trade and other payables, less cash and cash equivalents and receivables from government tax authorities. Almonty is not exposed to any externally imposed capital requirements.

Management's Discussion and Analysis  
 For the Three and Fifteen-Month Periods Ended December 31, 2019  
 Dated May 14, 2020

	December 31, 2019	September 30, 2018
Accounts payable and accrued liabilities	16,920	25,673
Long-term debt	49,499	50,331
Less: Cash and receivables	(3,276)	(13,355)
<b>Net debt</b>	<b>63,143</b>	<b>62,649</b>
Shareholders' equity	33,816	40,863
<b>Equity and net debt</b>	<b>96,959</b>	<b>103,512</b>
<b>Gearing ratio</b>	<b>65.1%</b>	<b>60.5%</b>

The gearing ratio exceeded the targeted range as at December 31, 2019 and September 30, 2018 due to the cumulative effect of deterioration in the commodity price environment in 2015 and 2016 having had a negative impact on net income (loss). Since that time, the commodity price environment has significantly improved, resulting in an improvement in the Company's cash flow generation capabilities, however the gearing ratio remains outside of the targeted range. The Company is working to improve its profitability, raise additional equity capital and /or reduce its outstanding debt levels in order to return the gearing ratio to targeted levels.

### Outstanding Share Data

As of the date hereof (May 14, 2020), there were 183,464,470 common shares outstanding 6,200,000 options outstanding, with each option entitling the holder thereof to acquire one common share of Almonty at a weighted average price of \$0.685 per share, and 1,300,000 share purchase warrants enabling the holders to acquire one common share at a price of \$0.75 per share.

As at December 31, 2019, the Company had the following Common Shares outstanding:

	Number of Shares	Amount \$
<b>Authorized - Unlimited number of common shares</b>		
<b>Issued and outstanding</b>		
Outstanding at September 30, 2017	169,751,679	86,350
Shares issued for cash	6,294,462	3,265
Shares issued on exercise of warrants	6,071,752	2,343
Shares repurchased under NCIB	(676,000)	(332)
<b>Outstanding at September 30, 2018</b>	<b>181,441,893</b>	<b>91,626</b>
Shares issued for cash	1,300,000	593
Shares repurchased under NCIB	(24,667)	(25)
<b>Outstanding at December 31, 2019</b>	<b>182,717,226</b>	<b>92,194</b>

Management's Discussion and Analysis  
 For the Three and Fifteen-Month Periods Ended December 31, 2019  
 Dated May 14, 2020

Outstanding stock options as at December 31, 2019:

The Company has established a stock option plan for its directors, officers, employees and technical consultants under which the Company may grant options to acquire a maximum number of common shares equal to 10% of the total issued and outstanding common shares of the Company. As of the date hereof there are 6,200,000 options outstanding, all of which are under this stock option plan, which was last approved by the Company's shareholders at the Company's Annual and Special Meeting of Shareholders held on March 28, 2018. All of the outstanding options are fully vested.

	<b>Number of Share Options</b>
Options outstanding at September 30, 2017	5,575,000
Options granted	1,275,000
Options expired	(650,000)
<b>Options outstanding at September 30, 2018</b>	<b>6,200,000</b>
Options granted	100,000
Options expired	(100,000)
<b>Options outstanding and exercisable at December 31, 2019</b>	<b>6,200,000</b>

As of December 31, 2019, the outstanding options, all of which are exercisable, are summarized as follows:

Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price
\$ 0.33 - \$0.75	2,875,000	6.70	\$0.452
\$ 0.76 - \$0.99	2,425,000	7.31	\$0.839
\$ 1.00 - \$ 1.07	900,000	2.15	\$1.017
	<b>6,200,000</b>	<b>6.28</b>	<b>\$0.685</b>

As at December 31, 2019, there are warrants outstanding enabling the holders to acquire up to 1,300,000 common shares at a price of \$0.75 per share, expiring between December 9 and December 17, 2022. These warrants were valued at \$233 using the Black-Scholes model. During the year ended September 30, 2018, the Company issued 6,071,752 common shares in connection with the exercise of share purchase warrants, all of which were exercisable at \$0.30 per share. During the fifteen months ended December 31, 2019, 3,482,769 warrants exercisable at \$1.26 expired and 670,468 warrants expired in fiscal 2018.

### 3. Quarterly Earnings and Cash Flow

### 4. Critical Accounting Estimates

The preparation of Almonty's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. In particular, information about significant areas of estimation uncertainty considered by management in preparing the consolidated financial statements is described in more detail in Note 3 and Note 8 of the 2019 Annual Financial Statements.

### 5. New Accounting Standards and Interpretations and Those Not Yet Adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the International Accounting Standards Board ("IASB") or IFRS Interpretation Committee ("IFRIC") and were effective for annual periods beginning after September 30, 2018.

The Company has adopted the following new and revised standards, along with all consequential amendments, effective October 1, 2018:

## **IFRS 9 - Financial Instruments**

IFRS 9, Financial Instruments was issued in final form by the IASB in July 2014 and has replaced IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

Most requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also amends the impairment model by introducing a new 'expected credit loss' model for calculating impairment. IFRS 9 also includes a new general hedge accounting standard which aligns hedge accounting more closely with risk management. This new standard does not fundamentally change the types of hedging relationships or the requirement to measure and recognize ineffectiveness, however it will provide more hedging strategies that are used for risk management to qualify for hedge accounting and introduce more judgment to assess the effectiveness of a hedging relationship.

The Company adopted IFRS 9 on October 1, 2018 and has determined that there was no material impact on its consolidated financial statements as a result of the adoption.

## **IFRS 15 - Revenue from Contracts with Customers**

IFRS 15, "Revenue from Contracts with Customers": the standard was issued in May 2014 and amended in April 2016. IFRS 15 applies to contracts with customers, excluding, most notably, insurance and leasing contracts. IFRS 15 prescribes a framework in accounting for revenues from contracts within its scope, including (a) identifying the contract, (b) identify separate performance obligations in the contract, (c) determine the transaction price of the contract, (d) allocate the transaction price to the performance obligations and (e) recognize revenues when each performance obligation is satisfied. IFRS 15 also prescribes additional financial statement presentations and disclosures. The Company adopted IFRS 15 on October 1, 2018, under the modified retrospective method where the cumulative effect is recognized at the date of initial application. It has been concluded that the adoption of IFRS 15 had no material effect on the Company's consolidated financial statements.

The following new accounting standard have not yet been adopted as they are not yet effective for the Company:

## **IFRS 16 – Leases**

In January 2016, the IASB issued IFRS 16 – Leases ("IFRS 16") which replaces IAS 17 – Leases ("IAS 17") and related interpretations. IFRS 16 provides a single lessee accounting model requiring the recognition of assets and liabilities for all leases unless the lease term is 12-months or less or the underlying asset has a low value. A lessee is required to recognize a right-of-use asset representing its right to use the

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

underlying asset and a lease liability representing its obligation to make lease payments. IFRS 16 substantially carries forward the lessor accounting in IAS 17 with the distinction between operating leases and finance leases being retained while requiring enhanced disclosures to be provided by lessors. Other areas of the lease accounting model have been impacted, including the definition of a lease.

The new standard is effective for the Company on January 1, 2020. The impact that adoption of IFRS 16 will have on its consolidated financial statements is in the process of being determined.

### **Off Balance Sheet Arrangements**

The Company has no off-Balance Sheet arrangements as at the date of this MD&A.

### **Proposed Transactions**

The Company has not entered into any undisclosed proposed transactions as at the date of this MD&A.

## **6. Related Party Transactions**

During F19, the Company paid or accrued compensation to key management personnel, which includes officers and directors, in accordance with the terms of their compensation arrangements of \$1,789 (F18 - \$981). No amounts are owing to key management personnel.

The Company incurred certain costs on behalf of the Company's Chief Executive Officer in the amount of \$324 which was repaid to the Company during Q3 2019.

The Company has long-term debt owing to DRAG, a company that is an existing shareholder of Almonty, and whose CEO is a member of the Board of Directors of the Company. In addition to the transactions disclosed in notes 8(b) and 8(d) of the Company's 2019 Annual Financial Statements, interest of \$619 was accrued on the DRAG loans during the fifteen months ended December 31, 2019 (2018 - \$397). As of December 31, 2019, there is \$1,195 (September 30, 2018 - \$576) of unpaid interest on these loans included in accounts payable and accrued liabilities.

## 7. General

### **Summary of the Company's Long-Term Supply Agreements**

Almonty, along with Daytal and Beralt, is a party to two long-term supply agreements dated September 23, 2011 and February 12, 2016 with one customer who participates in the global tungsten business. In the case of Daytal, the long-term supply agreement is dated September 23, 2011 and runs for a period of 10 years (the "Los Santos Supply Agreement"). In the case of Beralt, the long-term supply agreement is dated February 12, 2016 and runs for a period of 5 years (the "Beralt Supply Agreement" and, together with the Los Santos Supply Agreement, the "Supply Agreements"). The Supply Agreements provide for the supply of a minimum amount of tungsten concentrate to the customer in accordance with certain specifications of the customer. Pricing is based on a formula derived from the prior month's average of the high and low price for European APT per MTU as quoted on the MB and Metal Pages tungsten pricing service. Each agreement has an automatic renewal for an additional two years (unless either party provides at least three months' notice of its intention not to renew). The customer was also granted a right of first refusal for any tungsten concentrate (that meets the customer's specifications) produced by Almonty under each contract which exceeds the minimum amount required to be shipped under the terms of the relevant Supply Agreement.

The Company entered into Amendment No. 2 of the Los Santos Supply Agreement on April 20, 2015 where by the pricing mechanism was adjusted to reflect the inclusion of a secondary source for pricing of APT as well as an adjustment to the timing of the monthly average APT price used in the determining the selling price of concentrate.

The Company entered into Amendment No. 3 of the Los Santos Supply Agreement on February 8, 2016 whereby the Company extended the term of the Los Santos Supply Agreement for an additional 5 years.

The Company entered into Amendment No. 4 of the Los Santos Supply Agreement on April 1, 2016 whereby the Company amended the pricing mechanism under the contract.

The Company entered into Amendment No. 5 of the Los Santos Supply Agreement on February 1, 2017 whereby the Company amended the pricing mechanism under the contract.

The Company entered into Amendment No. 6 of the Los Santos Supply Agreement on February 22, 2017 whereby the Company amended the contracted volumes deliverable under the contract.

The Company entered into Amendment No. 7 of the Los Santos Supply Agreement on July 20, 2017 whereby the Company amended certain payment terms under the contract.

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

The Company entered into Amendment No. 1 of the Beralt Supply Agreement and Amendment No. 8 of the Los Santos Supply Agreement on December 1, 2019 whereby the Company amended the pricing mechanisms and the provisional pricing mechanisms were removed.

A redacted copy of each of the Supply Agreements and the related amendments thereto is available on SEDAR under Almonty's profile at [www.sedar.com](http://www.sedar.com).

## **Risks and Uncertainties**

The Company operates in the mining industry, which is subject to numerous significant risks that can influence profitability. The Company has disclosed several risks below which it believes to be the most significant and that could have a material impact on its current and future operations. Other risks may exist or may arise at a future date. For additional, and more detailed, risk factors, please see the Company's Annual Information Form dated May 14, 2020, under the heading "Risk Factors".

## **Financial Risks**

Financial Risk Management Objectives and Policies:

Almonty's principal financial instruments are comprised of cash deposits, bank indebtedness and long-term debt. The main purpose of these instruments is to provide cash flow funding for the operations of Almonty and its subsidiaries. Almonty has various other financial assets and liabilities such as trade receivables and trade payables, which arise directly from operations.

The main risks arising from Almonty's financial instruments are interest rate risk, foreign currency risk, commodity price risk, credit risk and liquidity risk.

### **Interest rate risk**

Almonty's exposure to the risk of changes in market interest rates relates to cash at banks and long-term debt with a floating interest rate. Of the long-term debt, \$25,569 is subject to floating interest rates and \$23,390 is subject to fixed interest rates. A portion of the floating rate debt totaling \$5,242 is subject to a fixed spread over the 6- and 12-month Euro Interbank Offered Rate ("Euribor") rates. A change of 100 basis points (1%) in the rates would result in a \$52 change in annual interest costs. The remaining floating rate debt of \$20,326 is based on a fixed spread over the 3-month Libor rate. A change of 100 basis point (1.0%) in the 3-month Libor rate would result in a \$203 change in annual interest costs.

The Company may in the future become a borrower of an additional material amount of funds or repay its existing outstanding long-term debt at any time without penalty. The Company's primary operations are located in Spain, Korea and Portugal. The ongoing uncertainty in the financial markets may have a negative impact on both the Company's future borrowing costs and its ability to obtain debt financing.

### Foreign currency risk

Almonty's wholly owned subsidiaries, Daytal and BTW, operate in Spain and Portugal, respectively, both of which use Euros (€) as their functional currency. Their output is a commodity that is primarily priced in United States dollars (US\$) which is different than the functional currency of the Company and its subsidiaries, and the Company and its subsidiaries may also incur costs or obtain indebtedness in a currency that is different from their functional currency. Almonty's functional currency is the Canadian dollar (CAD\$) but it advances funds to subsidiaries in the functional currency of the subsidiary to which funds are advanced. As such, the Company's interim condensed consolidated balance sheet and profit or loss can be significantly affected by movements in various currencies (CAD\$, US\$, AUD\$ and €).

The Company's Canadian dollar functional currency businesses have the following financial instruments denominated in foreign currencies:

	Currency	Carrying Value (\$)
<b>Cash and cash equivalents</b>	US\$	2
<b>Other assets</b>	AU\$	159
<b>Accounts payable and accrued liabilities</b>	US\$	2,450
<b>Accounts payable and accrued liabilities</b>	AU\$	378
<b>Accounts payable and accrued liabilities</b>	KRW	(2,262)
<b>Long-term debt</b>	US\$	26,127

A 5% change in the value of the CAD\$ relative to the above currencies would change net loss for the fifteen months ended December 31, 2019 by approximately \$1,327.

The Company's Euro functional currency businesses have the following financial instruments denominated in foreign currencies:

	Currency	Carrying Value (\$)
<b>Cash and cash equivalents</b>	US\$	592
<b>Trade receivables</b>	US\$	866
<b>Accounts payable and accrued liabilities</b>	US\$	1,081

A 5% change in the value of the Euro relative to the above currencies would have change net loss for the fifteen months ended December 31, 2019 by approximately \$19.

### Credit risk

The Company deposits surplus cash and restricted cash with major banks of high quality credit standing, in interest bearing accounts that earn interest at floating rates, Trade receivables represents amounts receivable related to delivery of concentrate that have not been settled and are with the Company's customers, all of

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

whom have good credit ratings and the Company has not experienced any credit issues with any of its customers. Other assets include a non-interest-bearing promissory note and deposits. The carrying value of the cash and cash equivalents, trade receivables, restricted cash, promissory note and deposits totaling \$2,363 represents Almonty's maximum exposure to credit risk.

### **Liquidity risk**

The Company's objective is to use cash and cash equivalents, finance leases, and third party short and long-term loans (see Note 8 of the Company's 2019 Annual Financial Statements for debt maturities) and equity in order to maintain liquidity. Almonty's policy is to maximize liquidity in order to enable the continued development of the mines and operations of the plants and to enable the development of its projects. All financial liabilities with a contractual term of 12 months or less are classified as current. The Company is currently pursuing debt and equity financing opportunities to increase its liquidity.

### **Commodity price risk**

Almonty's policy is to maintain exposure to commodity price movements at its mining operations.

### **Economic Dependency**

Daytal, Beralt and, together with Almonty, are parties to the Supply Agreements with one customer. Almonty is economically dependent on the revenue received from the customer in order to be able to meet its current obligations and is subject to the pricing terms set out in the Supply Agreements. There is no guarantee that Almonty would be able to find an alternative customer or customers on terms similar to its existing Supply Agreements should the customer cease operations or become unable to pay Almonty under the Supply Agreements. See above within this MD&A for further details.

### **Tungsten Market**

There is no assurance that a profitable market will continue to exist for the sale of tungsten. Tungsten prices have experienced significant movement over short periods of time and are affected by numerous factors beyond the Company's control, such as international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumption and demand patterns, speculative activities and increased production due to improved mining and production methods. Tungsten prices may be negatively affected by any slowing of the global economy, increases in exports from one market economy countries, notably China, and the release of tungsten concentrate onto the market from the U.S. National Defence Stockpile.

### **Operational Risks**

#### **Production**

Daytal's contract with Movimentos de Tierras Y Excavaciones, S.L.U. ("MOVITEX"), under which MOVITEX carries out contract mining activities for Daytal at the Los Santos Mine, was entered into for the life of the Los Santos Mine with an effective date of January 15, 2014. Daytal currently does not have

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

any mining capabilities of its own and relies on MOVITEX for all mining activity, including waste rock removal, pit development and delivery of ore to Daytal's crushing and processing plant. There is no guarantee that Daytal would be able to replace MOVITEX with another contract mining firm if MOVITEX were no longer able to provide contract mining services to Daytal. Any disruption in the contract mining services provide by MOVITEX would have a negative impact on Daytal's short-term economic viability. During the current period, Daytal has not required the services of MOVITEX as a result of a change of mine plan initiated during Q3-2019. Although Daytal has moved from ore extraction to tailings processing during the current period and to care and maintenance subsequent to December 31, 2019, Daytal is investigating additional sources of ore and, if determined to be economical, may re-engage the services of MOVITEX.

### **Competition**

The mining industry is very competitive, and the Company has to compete with other companies related to the acquisition of attractive mineral properties and the retention of skilled labour. Many competitors possess greater financial, technical and other resources than the Company. As a result, the Company may be faced with a shortage or no supply of ore or employees, as well as not being able to maintain or acquire mineral properties on reasonable terms or at all.

### **Risks Related to Property Title**

Although the Company leases all of the land of the Los Santos Mine from third party property owners as well as the two closest municipalities to the Los Santos Mine and the Company has obtained legal opinions on the titles to all of its properties, and although it has taken reasonable measures to ensure that all property titles are valid, there is no certainty that the property titles will not be challenged or questioned. Third parties could have valid claims to the lands occupied by the Company or immediately adjacent to the Company's leased lands.

### **Dependence on Key Personnel**

The Company is dependent on a relatively small number of key employees, of which the loss of any could have an adverse effect on its operations.

### **Laws and Regulations**

The Company's exploration and development projects are subject to laws and regulations, including those concerning mining as well as environmental and health and safety matters. The laws and regulations in place are susceptible to change and the impact of any modification is difficult to measure. The Company's policy is to maintain safe working conditions in compliance with applicable health and safety rules.

### **Licenses and Permits**

There can be no guarantees that the Company will be able to obtain or maintain all the necessary licenses and permits to extract and process minerals, explore, develop, or maintain its continued operations, or that the Company will be able to comply with all the conditions imposed. The current operating permits and plant capacity limitations at the Los Santos Mine allows Almonty to process up to 740,000 tonnes of ore

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

per annum. Any increase in available ore or significant increase in the concentration of tungsten contained in the ore may require the Company to expand its production and processing capabilities. The current operating permits and plant capacity limitations at the Panasqueira Mine allow Almonty to process up to 865,000 tonnes of ore per annum. Almonty completed an engineering study at the Sangdong Mine and was granted all the necessary surface permits enabling the Company to begin building the Sangdong Mine. The Company is working with POSCO as its EPC contractor for the construction of the mine and anticipates beginning the buildout of the mine once funding for the project has been secured. There is no guarantee that Almonty will be able to raise sufficient capital to fund the construction of the Sangdong Mine.

The mining license for the Los Santos Mine was granted in September 2002, for a period of 30 years and is extendable for 90 years. Daytal has to pay annual land taxes (approximately €2 per year) to the Spanish government. This amount is related to the surface covered and not to the production of minerals. There are no other royalty payments.

The current approved mine plan covers the period from January 2017 to January 2022 and comprises estimates of minimal disturbance activities during that period. The Company can revise and resubmit the mine plan within that period depending upon anticipated activities in future years.

The Company files applications in the ordinary course to renew the permits associated with its mining license that it deems necessary and/or advisable for the continued operation of its business. Certain of the Company's permits to operate that are associated with the mining license are currently under application for renewal. There is no guarantee that Almonty will be able to renew the necessary permits in order to continue operating.

As at December 31, 2019, Almonty has recognized a restoration provision of \$630 (September 30, 2018 - \$746) with respect to Daytal's future obligation to restore and reclaim the mine once it has ceased to mine tungsten ore from the Los Santos Mine. The restoration provision represents the present value of rehabilitation costs of \$852 relating to the mine site which are expected to be incurred beginning in 2027 after the Los Santos Mine ceases to mine ore based on the current estimate of economically recoverable ore resources. This provision has been created based on Almonty's internal estimates. Assumptions based on the current economic environment have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates are reviewed regularly to take into account any material changes to the assumptions. Actual rehabilitation costs will ultimately depend upon future market prices for the necessary decommissioning works required which will reflect current market conditions at that time. The timing of the rehabilitation is likely to depend on when the Los Santos Mine ceases to produce at economically viable rates. This in turn will depend on Almonty's ability to extend the mine life years through additional exploration and also on the future price of WO<sub>3</sub> concentrate. The Company has had its mine plan approved by the local mining and environmental authorities in the Province Salamanca and is currently awaiting approval of the regional mining authority in Castilla y Leon. Almonty's current mine plan entails ongoing reclamation work of the site as part of the pit optimization work (several small pits that have been fully mined are filled in and reclaimed as part of the regular waste rock movement and stripping work carried on other pits that are in production, as opposed to hauling the waste rock to the waste dump). The current mine plan under review by the relevant authorities entails the reclamation of the majority of the site as part of on-going operations and waste rock movement. The restoration provision currently recognized by the Company is estimated to be sufficient to cover any remedial restoration and reclamation work needed upon completion of the tailings reprocessing operation. Upon completion of open pit mining operations, during the period when the Company will process the bulk of its inventory stockpile

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

of mineralized tailings, Almonty estimates that the current restoration provision will be sufficient to complete all reclamation work required under its mine plan. The relevant Spanish authorities may determine, upon final review, that the amount required to be posted for future reclamation work be increased. Upon approval of the mine plan the Company intends to arrange an insurance policy to cover any increase in the assessed reclamation requirements. The Company anticipates that it will receive approval of its mine plan for the Los Santos Mine in calendar 2020 (the updated plan was originally filed in February 2015). The Company continues to work with the relevant authorities in Spain with respect to obtaining approval of its mine plan and is also engaged in active discussions with several insurance brokers to renew the insurance policy to cover the life of mine. The Company had posted an insurance policy to cover the anticipated reclamation costs when it originally filed its updated mine plan in February 2015. This policy expired in July 2016 and will be renewed upon final approval of the mine plan as filed. The relevant Spanish authorities are aware of the lapse in insurance coverage and are continuing their review of the mine plan as filed.

Banco Popular has posted a bank warranty of €180 (\$270) on behalf of Daytal with the Region of Castilla y Leon, Trade and Industry Department as a form of deposit to cover the expected costs of restoring the Los Santos Mine as required by Daytal's Environmental Impact Statement that forms a part of its mining and exploitation license on the Los Santos Mine provision. The bank warranty cannot be cancelled unless such cancellation is approved by the government of Castilla y Leon upon approval of the completion of the restoration work. The bank warranty is undrawn and carries a quarterly stand-by fee of approximately €1 per quarter.

There is a restoration provision of \$777 (September 30, 2018-\$482) with respect to the Sangdong Mine based on the amount assessed by the relevant local government authorities.

As at December 31, 2019, there is a restoration provision of \$31,677 (September 30, 2018 - \$25,130) with respect to the Panasqueira Mine's future obligation to restore and reclaim the mine once it has ceased to mine ore, currently estimated to be in the year 2045. The restoration provision represents the present value of rehabilitation costs relating to the mine site which are expected to be incurred subsequent to 2045. Total rehabilitation costs relating to the mine site are estimated to be \$34,694 and are expected to be incurred after the mine ceases production. Assumptions based on the current economic environment have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates are reviewed regularly to take into account any material changes to the assumptions. Actual rehabilitation costs will ultimately depend upon future market prices for the necessary decommissioning works required which will reflect current market conditions at that time. The timing of the rehabilitation is likely to depend on when the mine ceases to produce at economically viable rates. This in turn will depend on Almonty's ability to extend the mine life years through additional exploration and also on the future price of WO<sub>3</sub> concentrate.

Management's Discussion and Analysis  
 For the Three and Fifteen-Month Periods Ended December 31, 2019  
 Dated May 14, 2020

A summary of the Company's restoration provision is presented below:

Balance at September 30, 2017	32,335
Revisions in estimated cash flows and changes in assumptions	(4,809)
Accretion expense	435
Translation adjustment	542
Balance at September 30, 2018	28,503
<b>Revisions in estimated cash flows and changes in assumptions</b>	<b>7,286</b>
<b>Accretion expense</b>	<b>231</b>
<b>Deconsolidation adjustment (Note 6)</b>	<b>(2,050)</b>
<b>Translation adjustment</b>	<b>(886)</b>
<b>Balance at December 31, 2019</b>	<b>33,084</b>

### Political Risk

The Spanish, Portuguese and South Korean governments currently support the development of their natural resources by foreign and domestic companies. However, there is no assurance the government will not adopt different policies regarding foreign ownership of mineral resources, taxation, exchange rates, environmental protection, labour relations, repatriation of income or expropriation in the future.

### Litigation

All industries, including the mining industry, are subject to legal claims, with and without merit. The Company has in the past and may in the future be involved in various legal proceedings. While the Company is not aware of any possible legal proceeding that could have a material adverse effect on its financial position, future cash flow or results of operations of the Company, due to the inherent uncertainty of the litigation process and the defence costs which may have to be incurred, even with respect to claims that have not merit, there can be no assurance that the resolution of any particular legal proceeding will not have a material adverse effect on the Company.

### Risks Linked to Common Shares

The price of the common shares of Almonty may fluctuate for several reasons such as production and/or exploration results or operating results and cash flow, exchange rates, available financing, lack of liquidity and several other factors. It is possible that the price of a common share of Almonty may experience significant fluctuations and that such price might be less than the actual price paid by an investor.

## 8. Disclosure Control and Procedures and Internal Control of Financial Reporting

The Company's management, under the supervision of the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), has designed disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in National Instrument 52-109, *Certification of Disclosure in Issuers' Annual and Interim Filings*, based on the *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

DC&P are designed to provide reasonable assurance that material information relating to the Company is made known to the CEO and CFO during the reporting period and the information required to be disclosed by the Company is recorded, processed, summarized and reported in a timely and appropriate manner. ICFR is designed to provide reasonable assurance regarding the reliability of financial reporting for external purposes in accordance with international financial reporting standards. Due to the inherent limitations associated with any such controls and procedures, management recognizes that, no matter how well designed and operated, they may not prevent or detect misstatements on a timely basis.

The Company's management, under the supervision of the CEO and CFO, has evaluated both the design and operating effectiveness of its DC&P and ICFR and concluded that, as of December 31, 2019, they are not effective in providing reasonable assurance regarding required disclosures and the reliability of external financial reporting as a result of the following material weakness:

A material weakness is a significant deficiency, or combination of significant deficiencies, that result in more than a remote likelihood that a material misstatement of the annual or interim financial statements will occur and not be detected by management before the financial statements are published. Controls can potentially be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the control. The design of any system of controls also is based on part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

In its assessment of the effectiveness in internal control over financial reporting as of December 31, 2019, the Company determined it had ineffective design and implementation of internal controls over the financial statement close and disclosure process, including regarding assertions about the completeness, existence and accuracy of the financial information. Due to this material weakness, management concluded that ICFR was not effective as of December 31, 2019.

In light of the aforementioned material weakness, management conducted a thorough review of all significant or non-routine adjustments for the fifteen months ended December 31, 2019. As a result of this review, management believes that there are no material inaccuracies or omissions of material fact and, to the best its knowledge, believes that the consolidated financial statements for the fifteen months ended December 31, 2019 fairly present in all material respects and the financial condition and results of operations for the Company in conformity with international financial reporting standards.

Management's Discussion and Analysis  
For the Three and Fifteen-Month Periods Ended December 31, 2019  
Dated May 14, 2020

### **Remediation Plan for Material Weakness in Internal Control over Financial Reporting**

The Company is developing and will implement a remediation plan to address the material weakness described above. Specifically, the Company plans to increase the depth and timeliness of management's review procedures over the financial close process and related ICFR.

### **Changes in ICFR**

National Instrument 52-109 also requires Canadian public companies to disclose any change in ICFR during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, ICFR. There were no changes made to the Company's ICFR during the three months ended December 31, 2019 which have materially affected, or are reasonably likely to materially affect, ICFR.

## **9. Management's Responsibility for Financial Statements**

The information provided in this report, including the Company's financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgements and have been properly reflected in the accompanying financial statements.

May 14, 2020

On behalf of Management and the Board of Directors,

*"Lewis Black"*

---

Chairman, President and Chief Executive Officer

## Glossary of Terms

APT	ammonium para tungstate is an intermediate product which is one of the principal chemical forms in which tungsten is traded
Concentrates	the valuable fraction of an ore that is left after waste material is removed in processing
€	Euros
MB	Metal Bulletin of London
MTU	metric tonne unit, equal to 1 percent of a metric tonne or 10 kg (22.046 pounds) of contained WO <sub>3</sub>
NI 43-101	National Instrument 43-101 – <i>Standards of Disclosure for Mineral Projects</i>
Scheelite	a brown tetragonal mineral, CaWO <sub>4</sub> . It is found in pneumatolytic veins associated with quartz and fluoresces to show a blue color. Scheelite is a mineral of tungsten
Tonne	a metric unit equal to 1,000kg (2,204.6 pounds)
Tungsten concentrates	concentrates generally containing between 40 and 75 percent WO <sub>3</sub>
US\$	United States dollars
W	the elemental symbol for tungsten
WO <sub>3</sub>	tungsten tri-oxide, a compound of tungsten and oxygen
